Sweet Words

Happy Eid

Hello Dear friends..

When Eid comes, happiness accompanies it with its new outfit and joyful atmosphere.

Eid is an occasion that gives us happiness, it is an occasion that we should receive well.

Eid, is wearing the new, prayers for long life; all wishes accompany us every Eid morning, we pray for those who love: young and old; relatives and acquaintances .. Congratulations continue with all the faces we encounter and greet during Eid.

In Eid we meet relatives and friends, remember those who passed away in our prayers, we inspect the children of the neighborhood and poor people, and we do not forget them with congratulations and Eidi.

Oh Allah! make this country safe, reassuring, generously prosperous, full of happiness and joyful occasions .. "Happy Eid".

Tyre Safety Campaign launched for cars and trucks

The Roads and Traffic Authority (RTA) has organised a one-week campaign to check tyre safety in light and heavy vehicles in its Customer Happiness centre in Al-Barsha, and Vegetable and Fruit Market. The campaign was organised in cooperation with Dubai Municipality's Assets Management Department, Emirates National Oil Company (ENOC), and Michelin Tyres. The campaign included tests for tyres to reveal any kind of defect, and advice on early detection of wear and tear. The campaign also urged drivers not to neglect changing tires before they wear out, especially in summer's high temperatures, as they could burst while driving and lead to serious accidents. Awareness messages had been broadcasted also on some Arabic and English speaking radios. Campaign organisers also offered drivers presents and AED300-discount vouchers on their next change of tyres, in addition to meals and juices presented by the KAF Group.

RTA joins Global Family Day celebrations

RTA Traffic Department has participated in the activities of the Global Family Day 2017 celebrated by Dubai Police General Command along with many other government entities and private establishments. The department's contribution covered traffic safety awareness activities including the distribution of traffic safety brochures to families. RTA team also explained to the children how the Salama magazine's application works, and how to download it unto their smart devices to enjoy its excellent content. A draw was also made for participants in a download competition of the application, and prizes distributed to the winners.

New version of Salama Smart Application launched

The Traffic Awareness team has visited a number of private schools in Dubai as part of a promotional campaign to introduce students to a new upgrade for Salama Smart Application. Students at December 2nd School, Dubai International School (Barsha, Garhoud) and Carmel Dubai School were instructed on how to download the Salama Smart Application and its new upgrade on their smart devices. They were guided on how to use its attractive features, including exciting new short stories, new games, puzzles and competition, 3D drawings and educational movies made for both children and parents.

Child Safety Programme offers prize

In cooperation with Dubai Health Authority and Johnson & Johnson, the Child Safety Programme, which is organised by the Traffic Awareness Section, made a draw on a car child seat at the maternity ward of Lateefa Hospital, and handed it to the winning mother. The draw is part of the educational programme targeting mothers, which aims to raise their awareness on best protection practices for babies and children in traffic accidents, and how to avoid accidents.

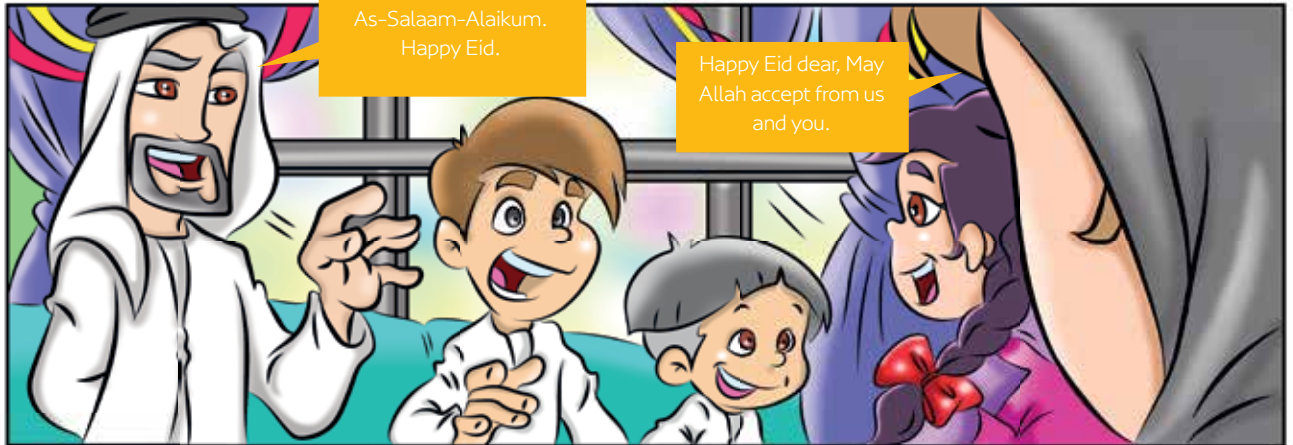

Teaching with fun at Kids Venture

Children from Kids Venture kindergarten were given a great time of fun and learning during a workshop organised recently by the Traffic Awareness Section at the Jumeirah Walk. The children and their mothers were shown films on traffic safety via the Salama Magazine application, and the children were given special drawings to colour and learn about the zebra crossing through Augmented Reality games.

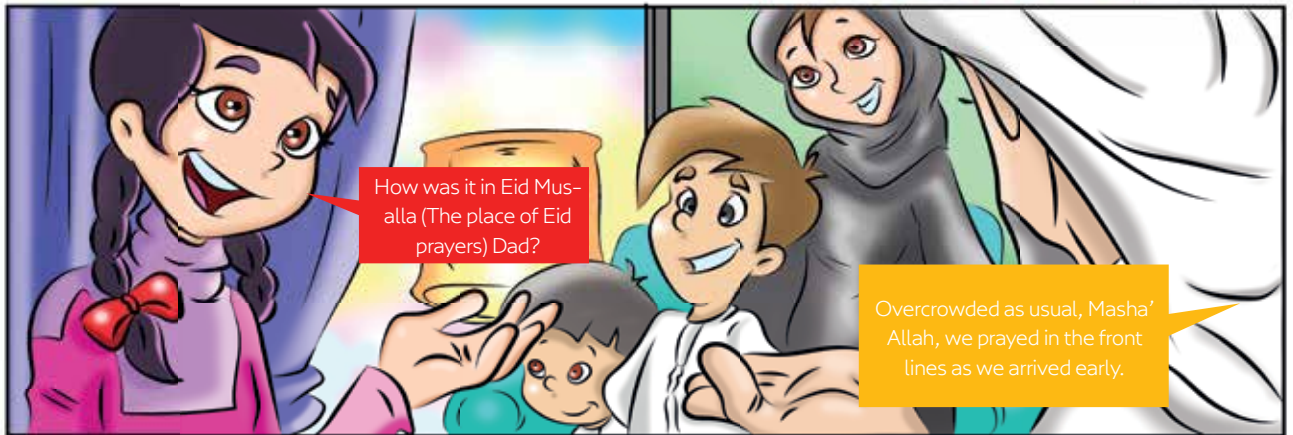

Eid al Fitr

As-Salaam-Alaikum.
Happy Eid.

Happy Eid dear, May
Allah accept from us
and you.

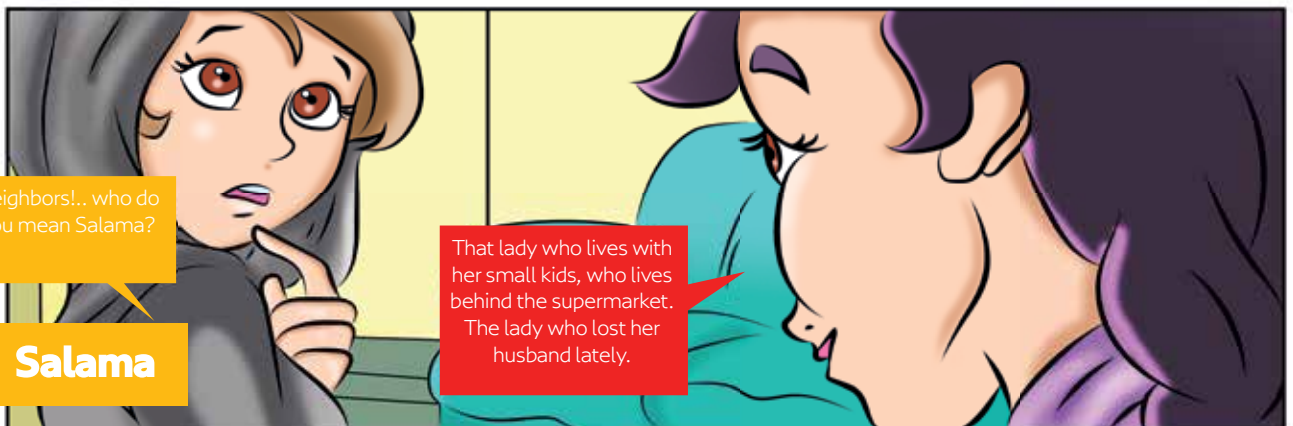

How was it in Eid Mus-
alla (The place of Eid
prayers) Dad?

Overcrowded as usual, Masha'
Allah, we prayed in the front
lines as we arrived early.

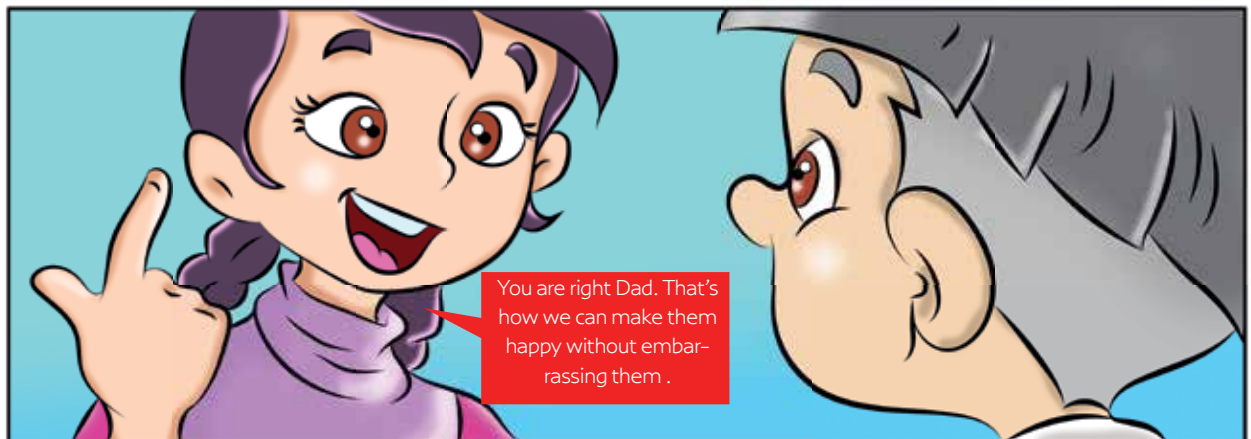

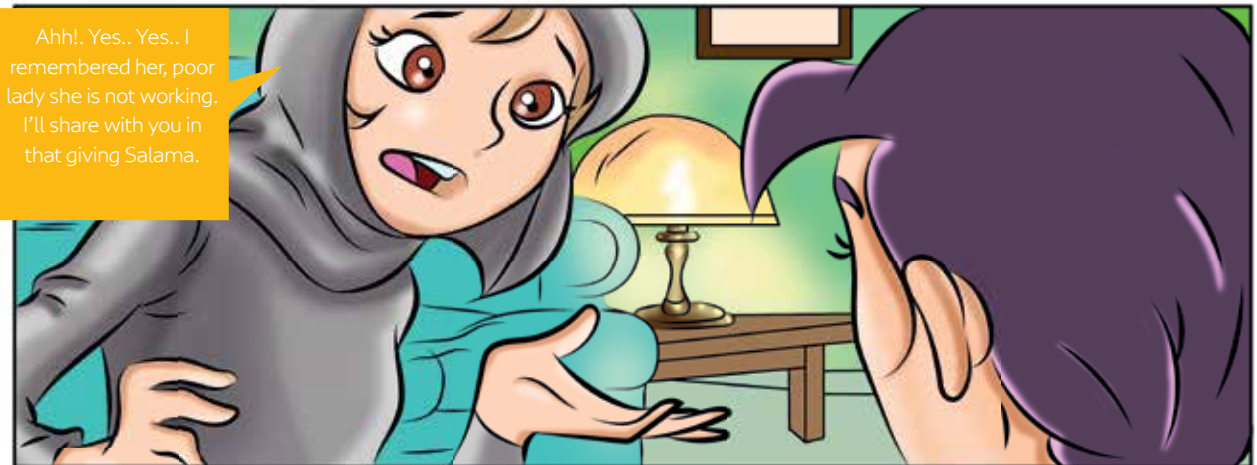

Tell me Salama, what
are you planning to do
with your Eidia (like
money, gift or present)?

I'll distribute half of it
among our neighbors,
the other half for shop-
ping.

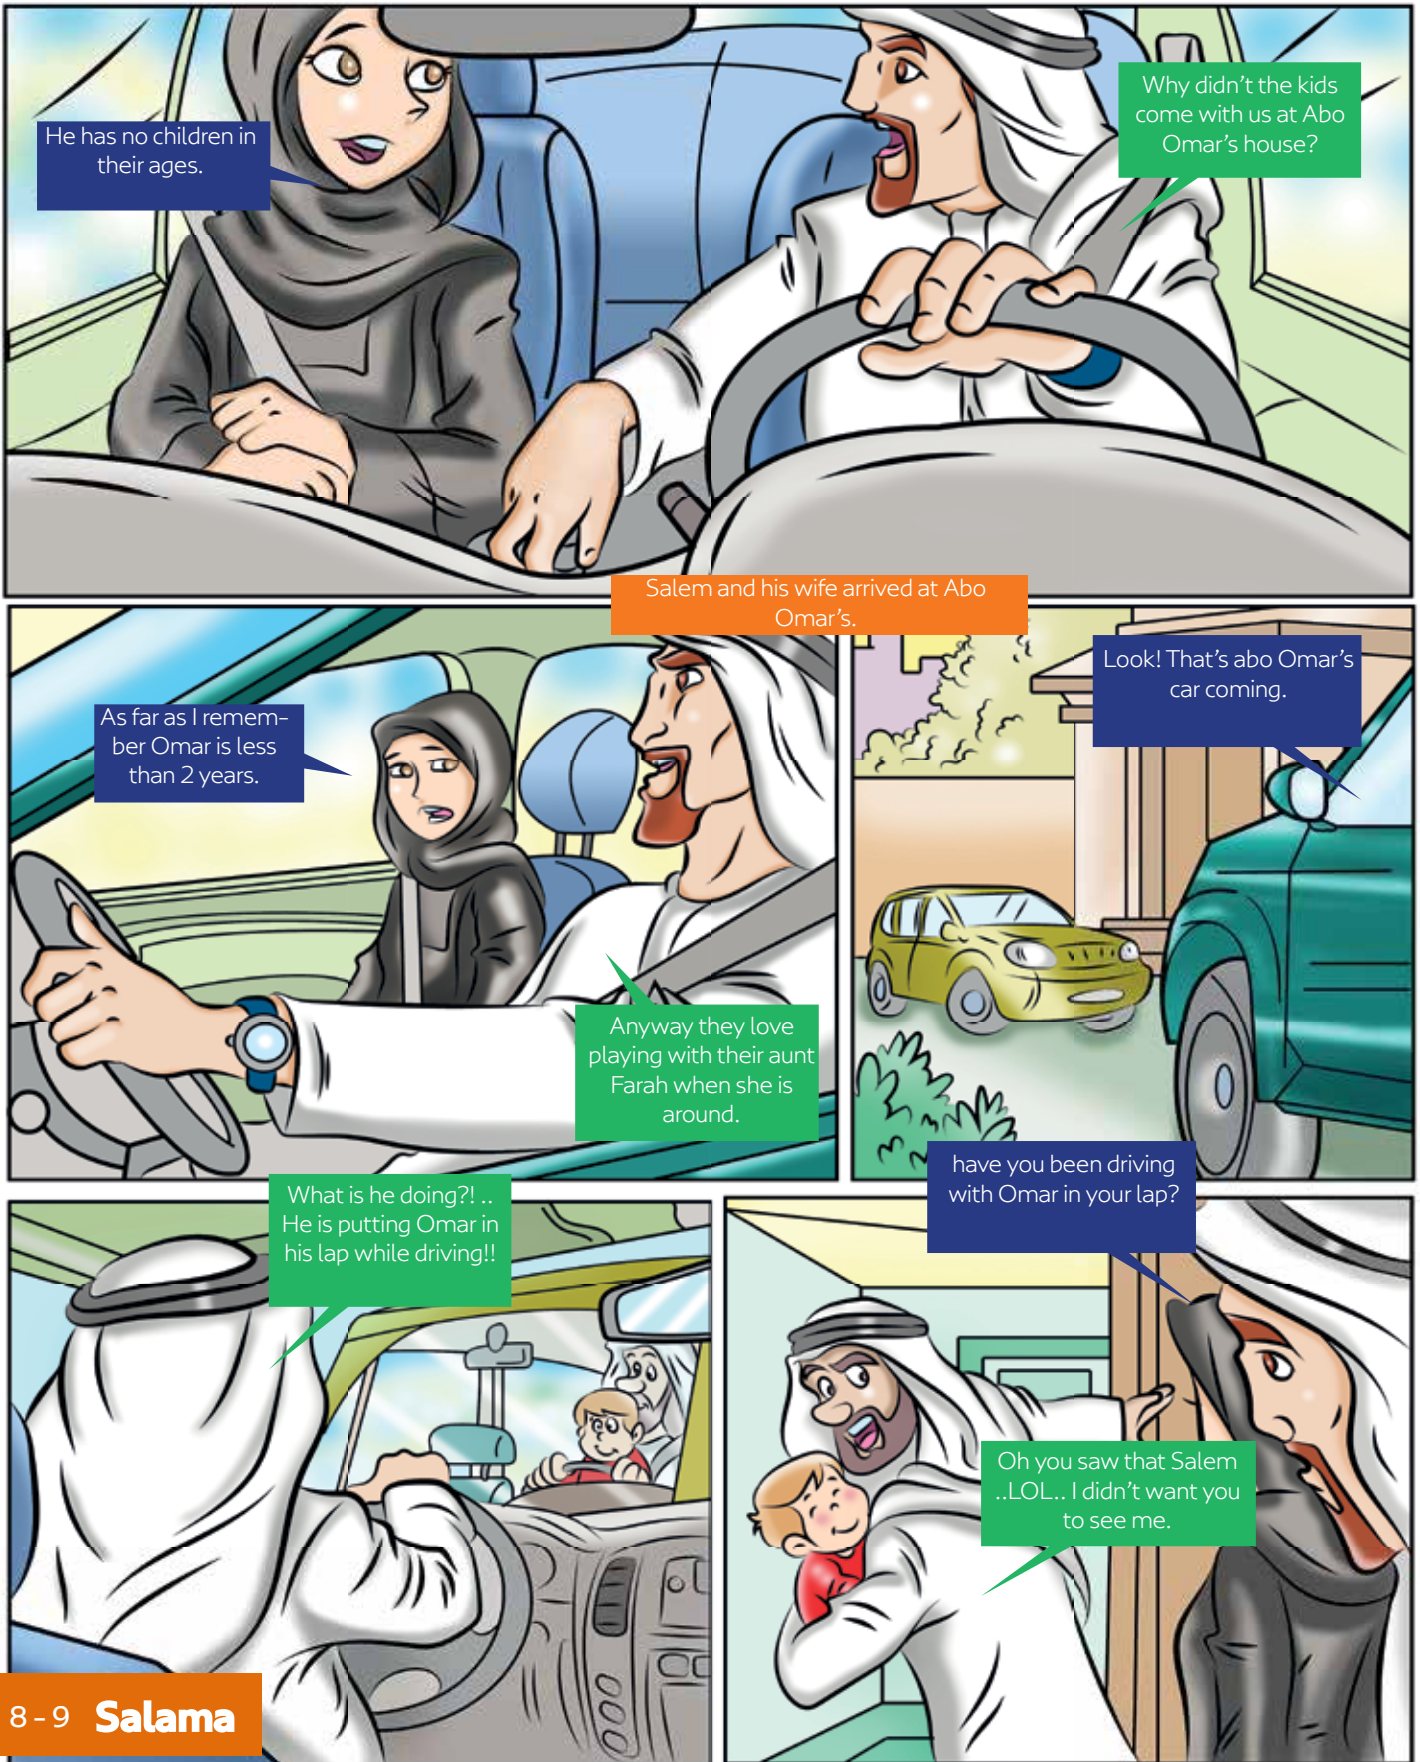

Neighbors!... who do
you mean Salama?

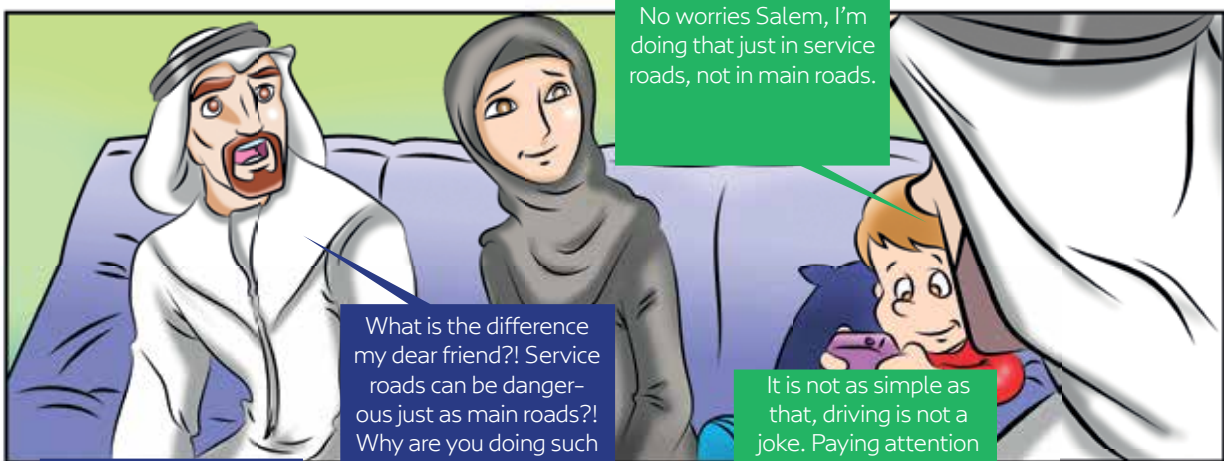

That lady who lives with
her small kids, who lives
behind the supermarket.
The lady who lost her
husband lately.

Spoiled Amori

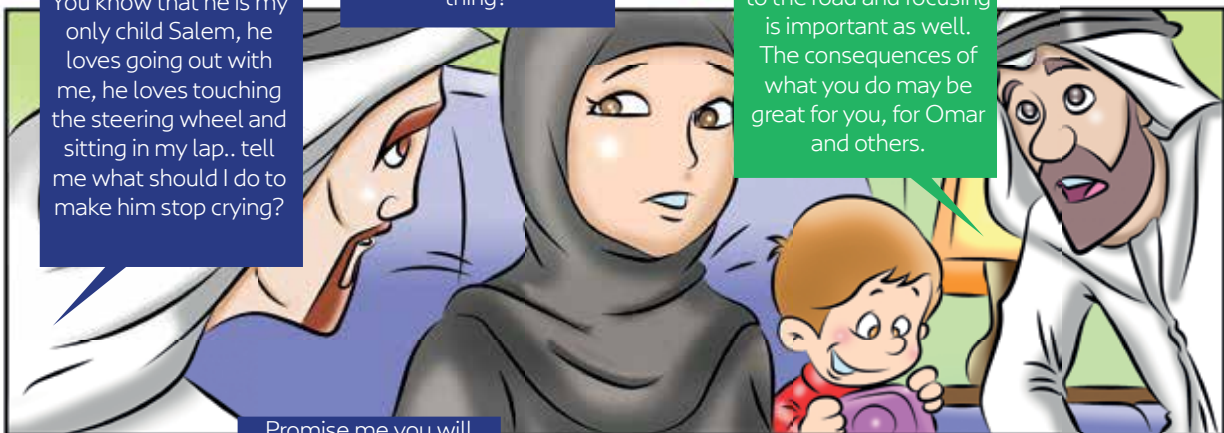

No worries Salem, I'm doing that just in service roads, not in main roads.

What is the difference my dear friend?! Service roads can be dangerous just as main roads?! Why are you doing such thing?

It is not as simple as that, driving is not a joke. Paying attention to the road and focusing is important as well. The consequences of what you do may be great for you, for Omar and others.

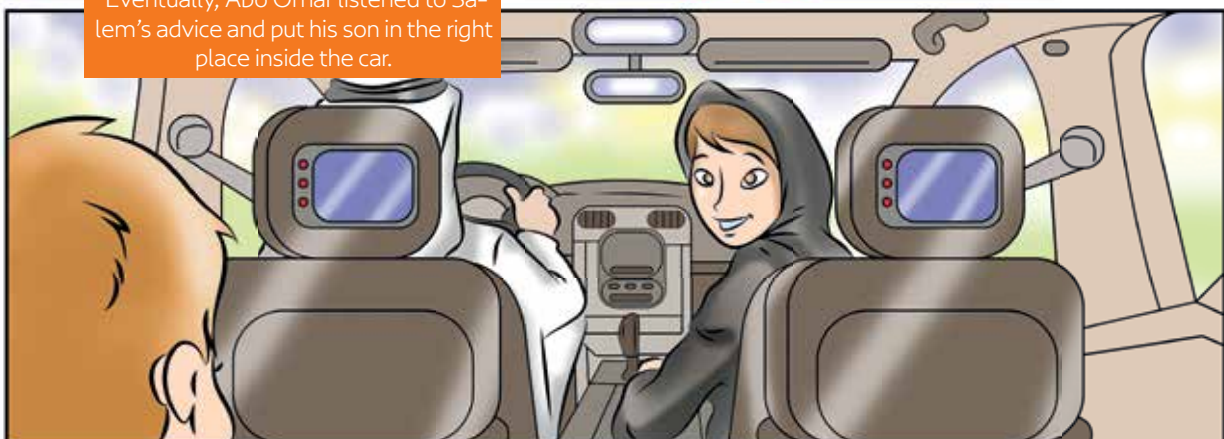

You know that he is my only child Salem, he loves going out with me, he loves touching the steering wheel and sitting in my lap.. tell me what should I do to make him stop crying?

Promise me you will never do it again and Make sure that Amori's safety is better than making him happy for few dangerous moments that could threatens his life.

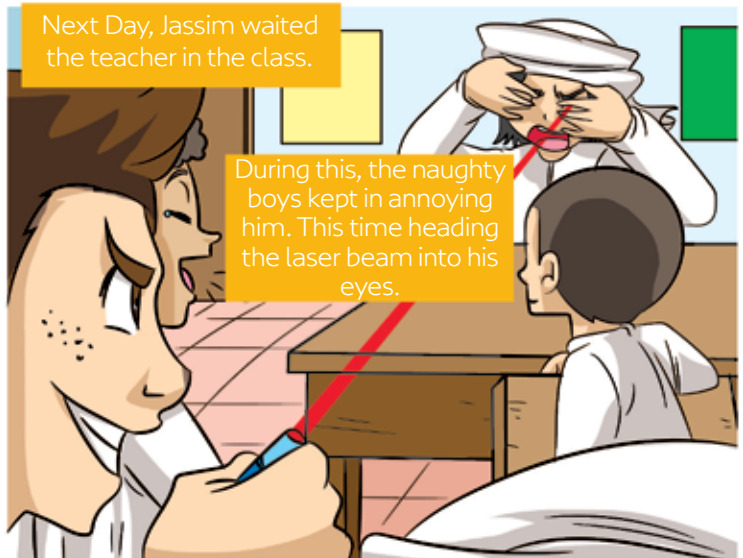

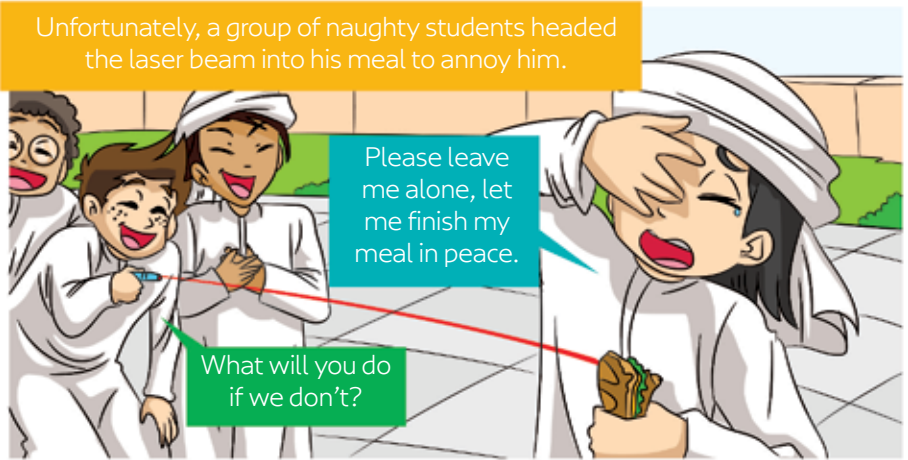

Eventually, Abo Omar listened to Sa-lem's advice and put his son in the right place inside the car.

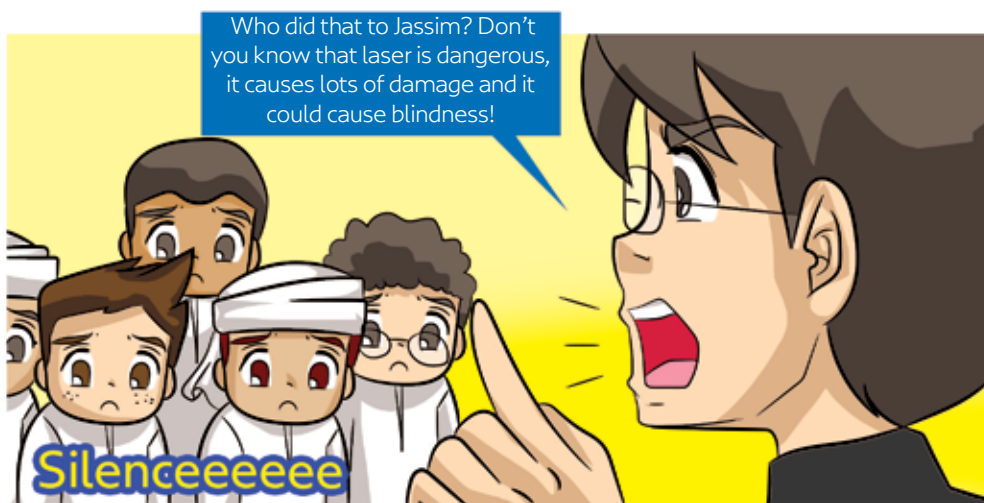

Safe School

Super nader cured Jassim's eyes in no time. The pain goes away, then he turned to the naughty boys.

Who did that to Jassim? Don't you know that laser is dangerous, it causes lots of damage and it could cause blindness!

Silenceeeeeee

Okay, if you don't say who did it I'll inform school management about all of you.

Please don't

We're sorry.

We will never do it again.

Okay, I'll forgive you this time, but promise you'll never repeat it, or then I'll not forgive. As for you Jassim, you must always tell the teacher about any wrong behavior done

by others. Like if they bring laser, weapons, drugs or any such things.

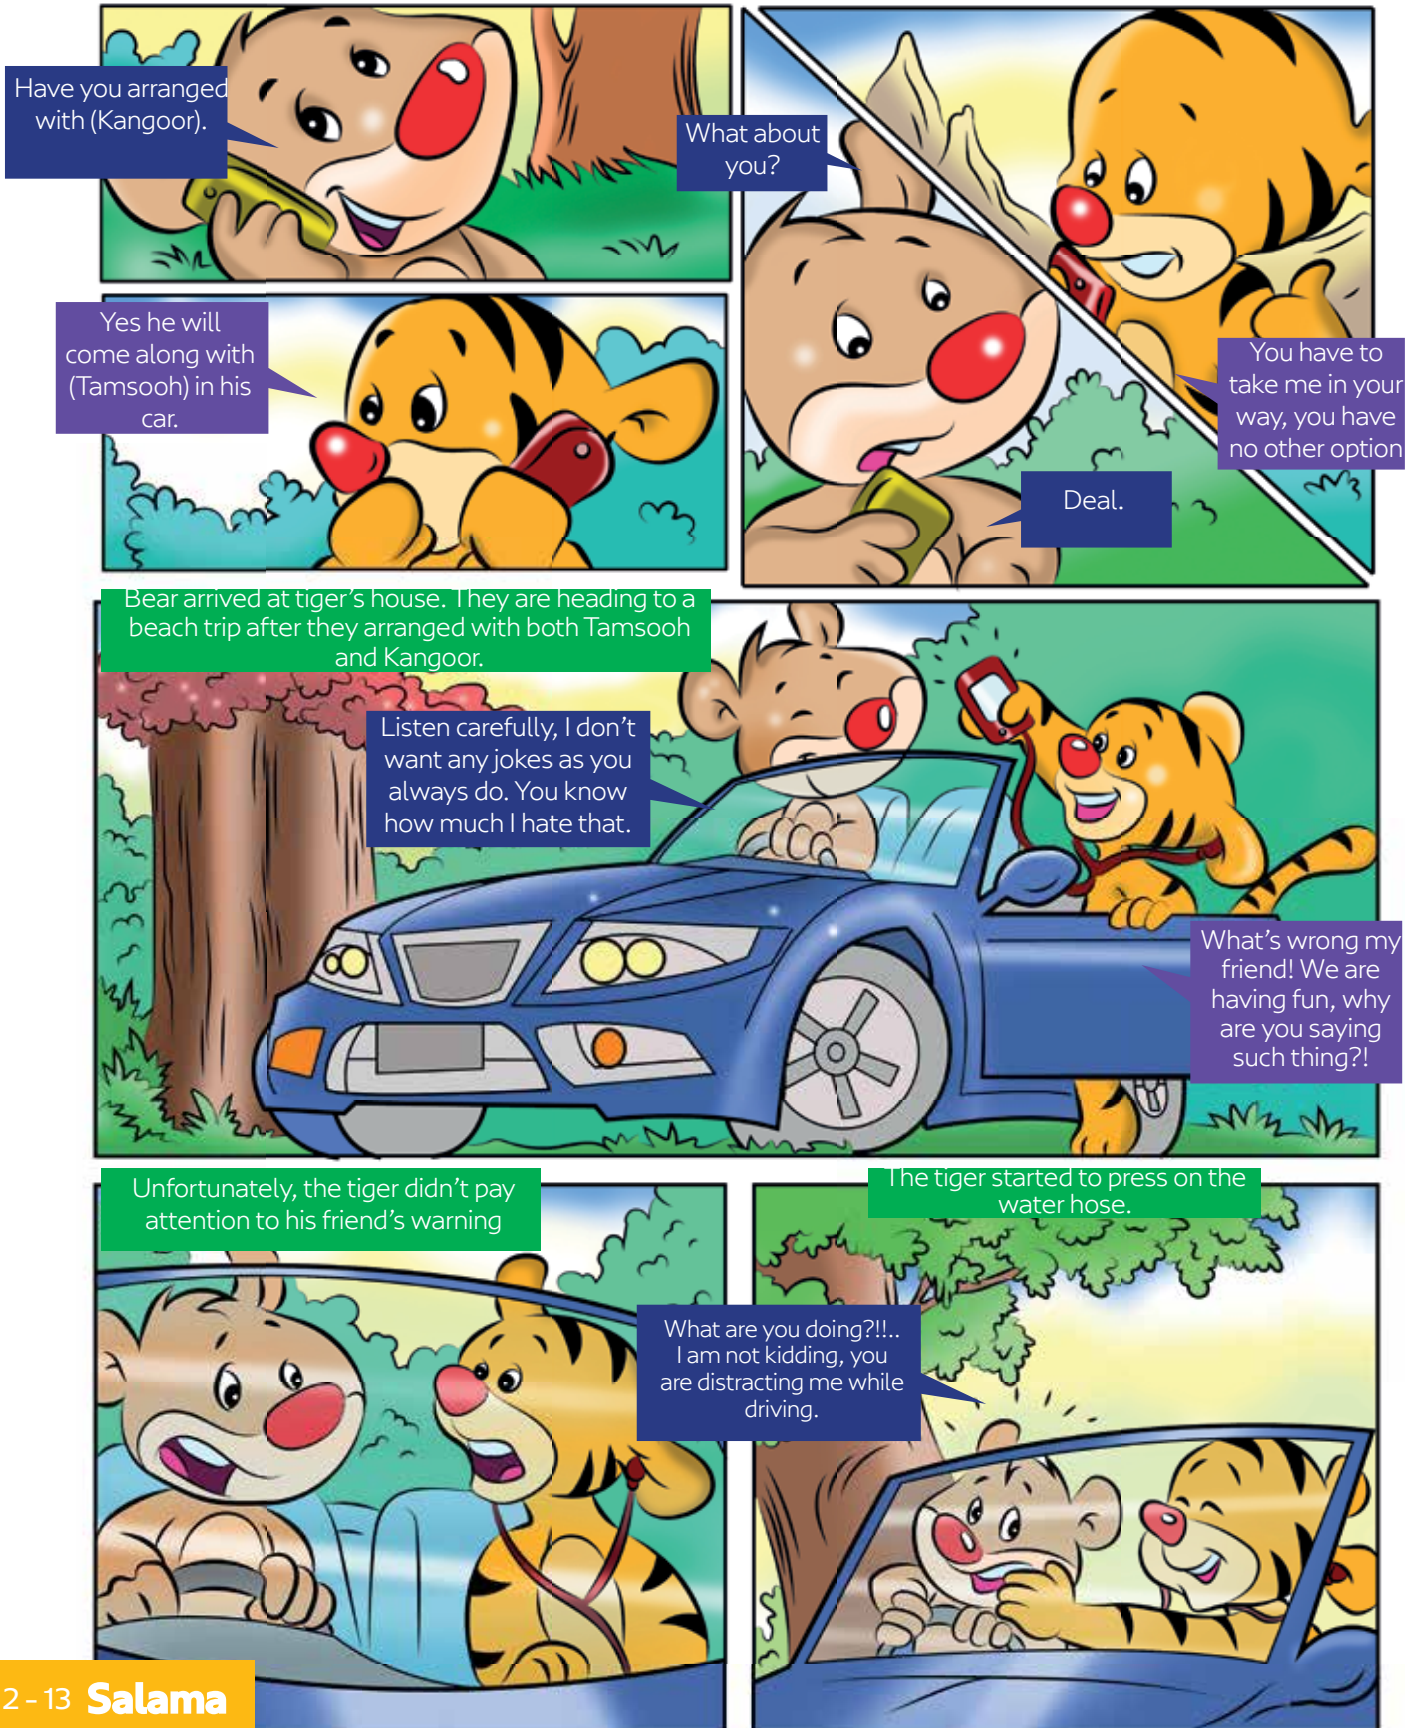

In that case I'll snitch, nobody will love me!

I'll do that Insha' Allah, thank you for these tips super hero.

This is not considered snitching off, this will be out of your concern about your safety and your friends' safety as well. It is also better if you join a group of good friends, away from the naughty kids.

Unwanted Jokes

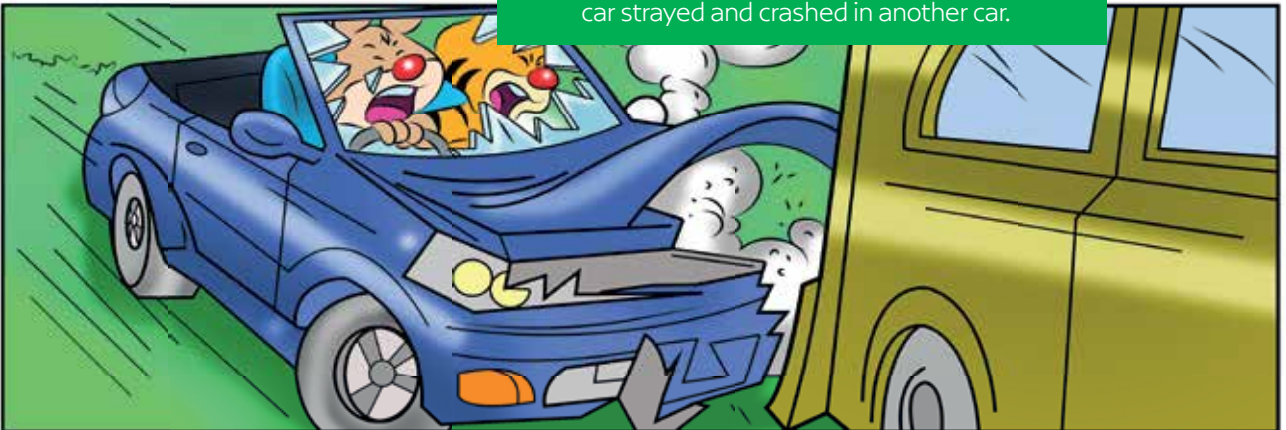

LOL! I'm just cleaning the windshield.

Bear, lower this sound, you are such a noisy friend, please lower it.

After a while, the bear couldn't control his car. The car strayed and crashed in another car.

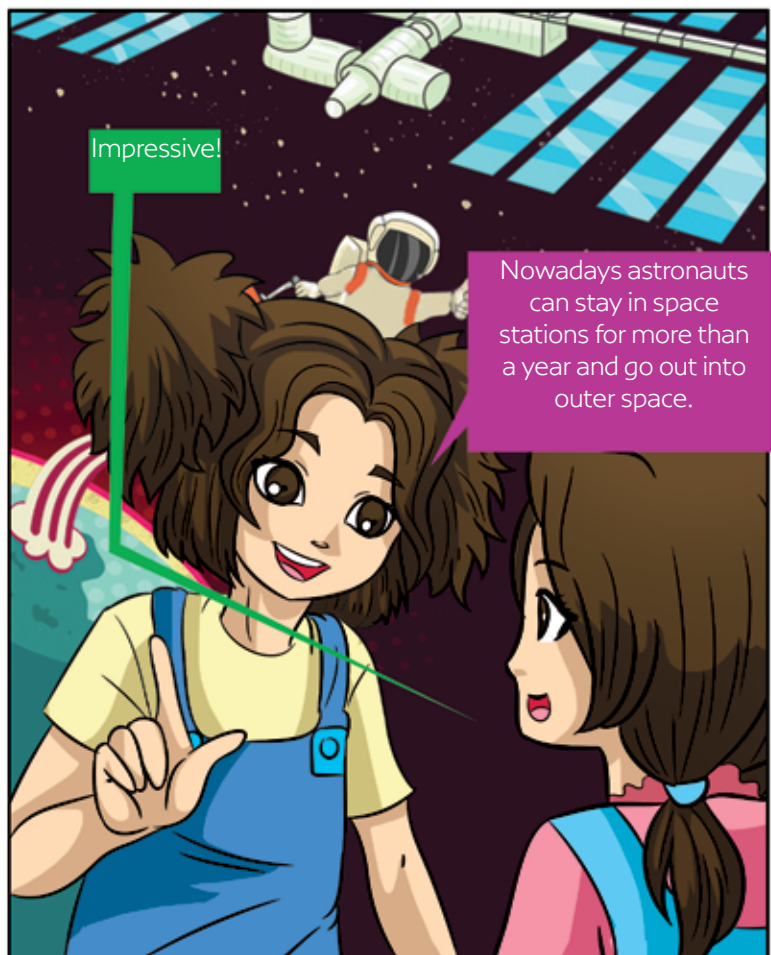

See the result of joking, I told you from the beginning not to repeat these actions with me.

Main reason of congestions

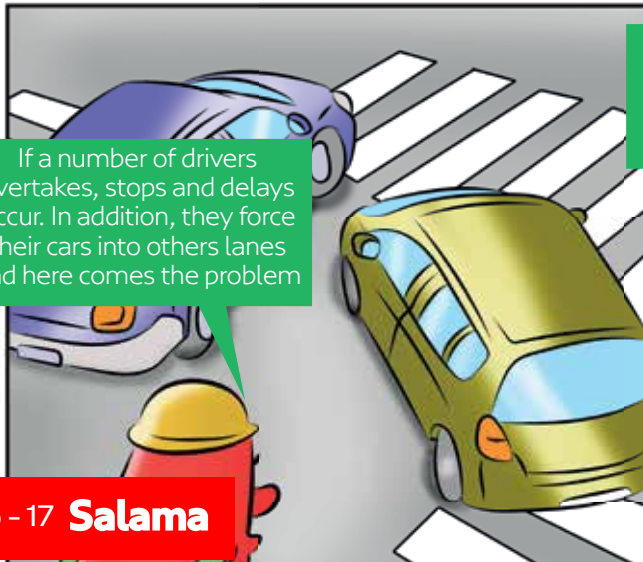

Hello dear friends, all of us are complaining of congestions. This is often due to some of the vehicle drivers.

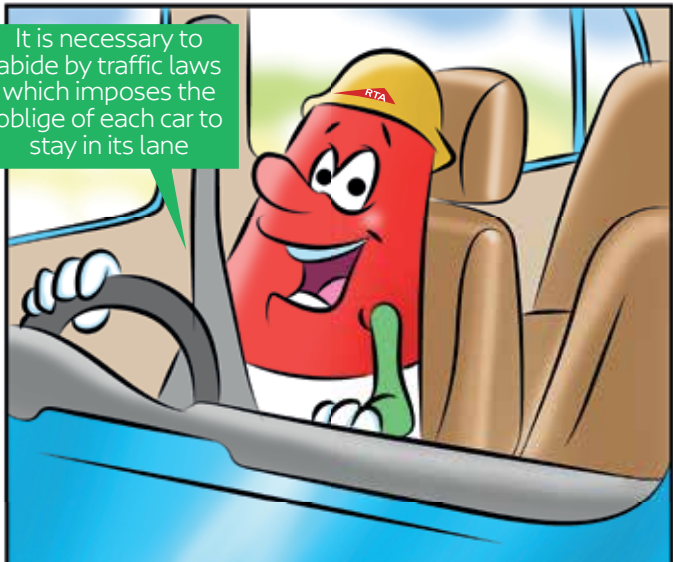

Of the most reasons for congestions are wrong overtaking and not staying in the same lane.

If the driver stays in his lane, these congestions will not occur.

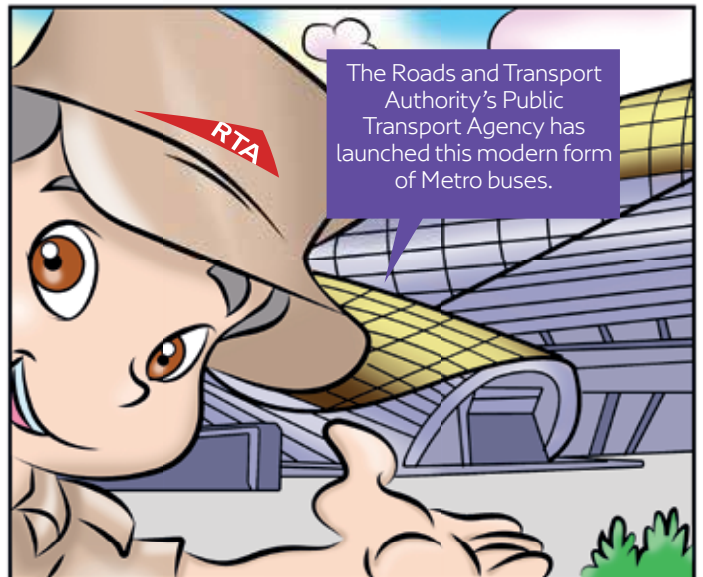

If a number of drivers overtakes, stops and delays occur. In addition, they force their cars into others lanes and here comes the problem

It is necessary to abide by traffic laws which imposes the oblige of each car to stay in its lane

Metro Buses

The idea started with 70 buses roaming Dubai in this color, to become 186 buses during the first quarter of 2017.

Cyborg and Future Accelerators

Scenario: Eman Hosny Drawings: Shaimaa Ibrahim

Hello friends. I am Cyborg a hypothetical person. I'll talk with you about Future Accelerators.

More than 30,000 particle accelerators are in operation around the world, serving medicine, industry, energy, the environment, transportation, and discovery science. As accelerator science and technology continue to advance, so too will their benefits to society.

Today I'll resume talking about 3D printing technology. I'll tell you today about 3D printing for medical industry

3D for the Medical Industry can accelerate time to Create clinical Trial Devices. In the past, prototypes were used sparingly in medical design work due to cost and time considerations, but 3D Printing provides a faster, more streamlined system that allows medical product manufacturers to develop clinical trial-ready devices in-house to check everything from form, fit and function to manufacturability

3D for the Medical Industry can Create End-use Medical Devices. Medical devices can also be difficult to produce, due to the small size and intricacy of the parts. Some medical parts are as small as a staple and measure just 0.020 inches in thickness. 3D Printing allows manufacturers to easily create these difficult parts from 3D CAD models

It can also plan out Medical Procedures with Precise Anatomical Models. In cases where complex, multi-faceted surgical procedures are required, the ability to predetermine the best possible outcome is key. Anatomical modeling – made possible through the use of Stratasys 3D printing systems – allows surgical teams to evaluate several different treatment scenarios before deciding on a plan that ensures these needs are met

Waiting for you in the next issue to know more about 3D printing applications

Eggplant pizza

Hello dear friends, there are many & varied types of Pizza. Today we have a special and strange kind of pizza. "Eggplant Pizza". Let's prepare it together.

All what we need is:

Sliced & salted eggplant- 1 cup of bread crumps -Pepper-Pizza Sauce- Mozzarella Cheese -wild thyme

Mix all ingredients and dip sliced eggplant in the mix, then fry it.

Place the slices in an oven tray, preferable if a circular shape as you see.

Add tomato sauce and mozzarella cheese on top of eggplant slices.

Bake them in the oven for 15 minutes. Bon appetite.
