Sweet Words

Salama in Vacation

Hello Dear friends..

Several weeks have passed and Salama and her family are in the home quarantine, living social distance, and looking forward to the relief of this crisis, and for life to return as it was, after the return to normal life was gradually announced, which promises the end of this epidemic, God willing.

We can enjoy the holidays while we are in our homes learning a new craft or skill, reading our favorite books that we did not have time for, playing some family games like chess, Carrom tabletop game, dominoes, etc., which creates an atmosphere of joy among the members of the same family. We can also prepare and cook light recipes, or write our own blogs that document

this event and describe our feelings, share them with others on the pages of social media channels, and also try to watch programs with friends via digital cinema. Also, we can rearrange our rooms and some of our furniture, in addition to joining online training courses, and we will find ourselves enjoying and satisfied with what we do.

We can also go outing with the family in nature and open areas, with our commitment to keep physical distance, taking care and caution, spending beautiful times and we are safe and secure.

Top Scoop

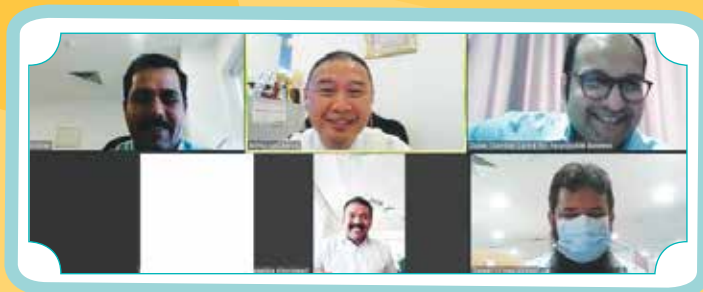

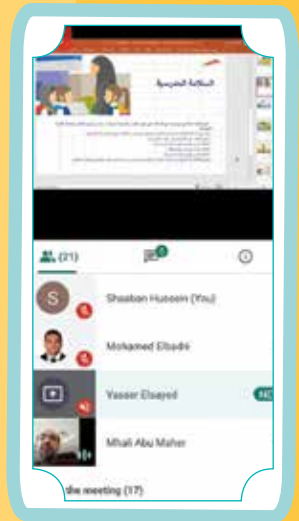

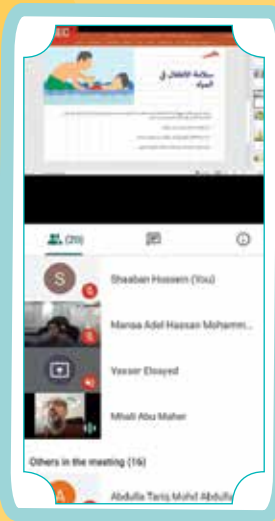

Distance lectures for students and drivers

Awareness activities for targeted groups continued in Dubai through the "Distance Awareness" program that was introduced by the Traffic Awareness Section after applying the precautionary measures to confront Covid19-.

The Section has organized several awareness lectures during the past weeks, targeting students at Dubai schools, and employees of some transportation companies operating in Dubai. Many students and parents at Dubai National School and its two branches in Al Barsha and Al Twar through "Microsoft teams" have listened to

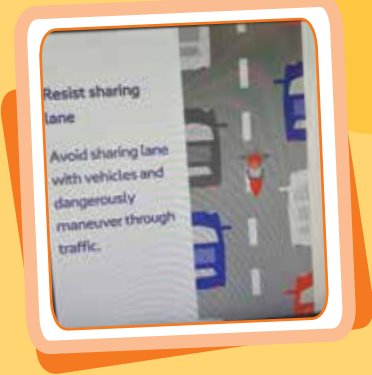

awareness tips from the awareness booklet "Parents' Guide to Child Safety", in addition to reviewing the precautionary measures followed by the Dubai Roads and Transport Authority to maintain the safety of metro users.

Traffic Awareness Section also participated in the open day organized by the 2nd of December School for Basic Education with the participation of Dubai Police. During the past month, the department organized a remote awareness lecture for drivers of "Tristar" company, which operates in the field of transport and delivery.

Awareness film for delivery companies' Motorbike drivers

The Traffic Awareness Section has prepared an awareness film directed at Motorbike drivers working in the field of delivery. The film, that was sent to the delivery companies, included the basic rules and laws governing the movement of motorcycles in the street, how to avoid accidents, and the importance of commitment to traffic safety measures.

Safety and epidemic Prevention guidelines while using Dubai Metro

Distance Awareness

Hello my friends. Did you know that RTA sterilizes and cleans all the 47 Dubai Metro stations and all the 79-metro trains daily to ensure the health and safety of passengers?

1

Remember face masks is mandatory

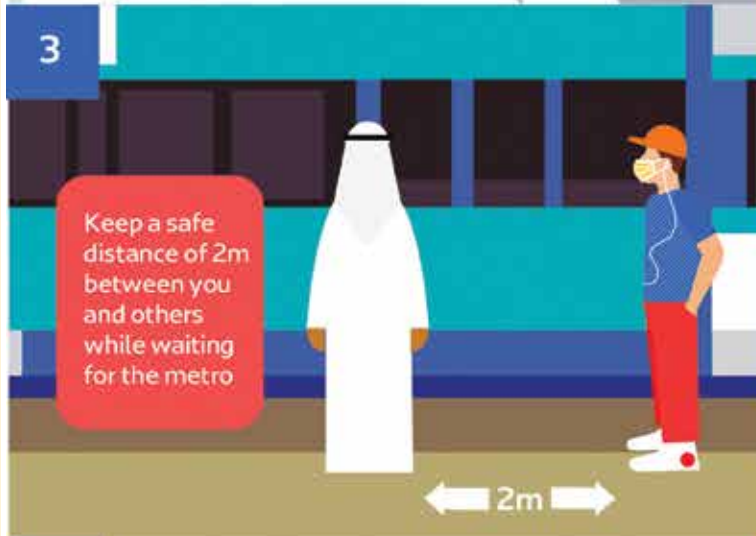

2

Plan your journey on the metro in advance, avoid peak hours and be sure to follow the instructions of the station supervisors

3

Keep a safe distance of 2m between you and others while waiting for the metro

4

Make sure there is an empty seat next to you and follow the alternate seating policy

5

Don't crowd around the metro entrance and wait for the next trip if the cabin is full

6

Don't forget to use an antiseptic to sterilise your hands after touching the surfaces knobs and handles ... Stay safe

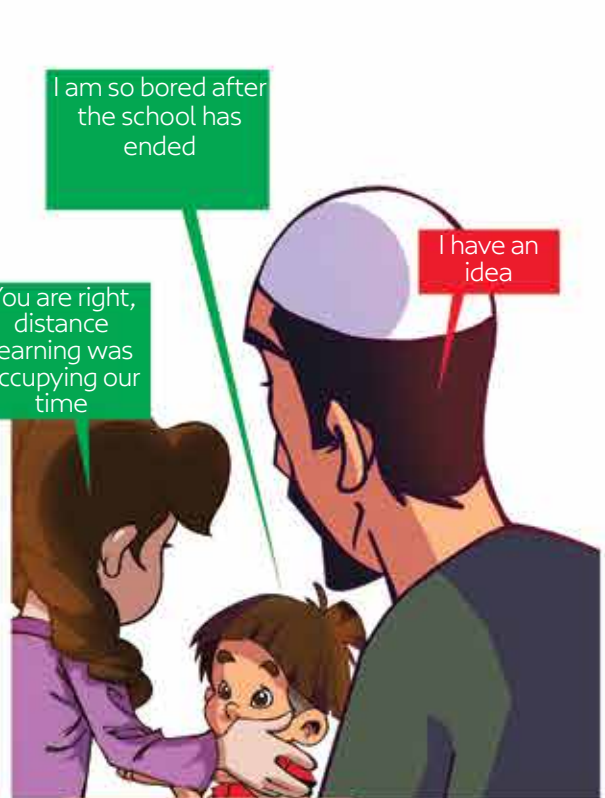

Fun and entertaining Summer, Remotely!

Scenario: Lolwa Thani

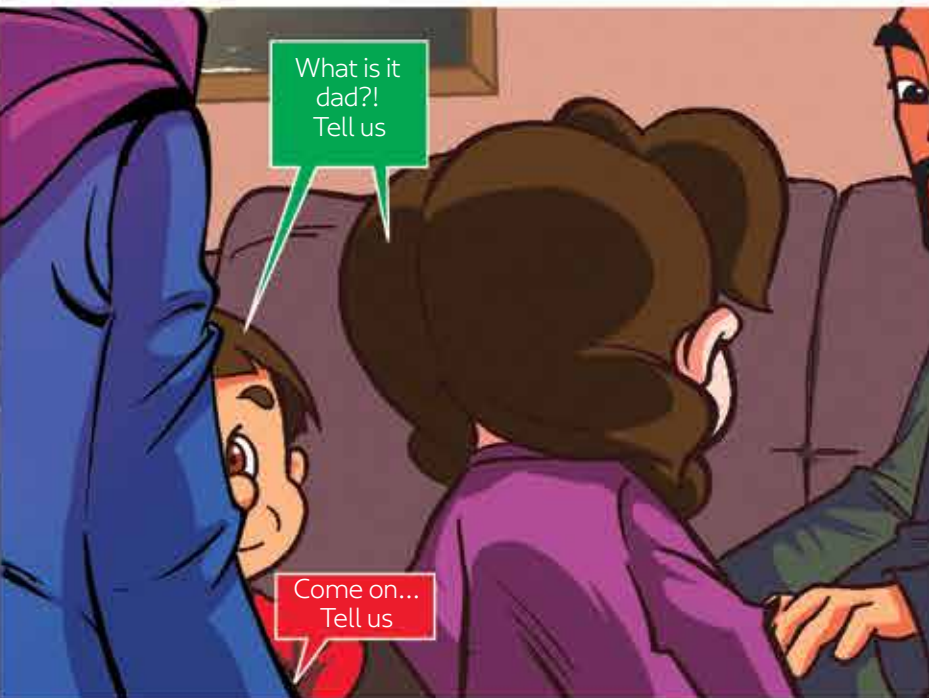

Why are you sitting alone... and why is the sad face?

I am so bored after the school has ended

I have an idea

You are right, distance learning was occupying our time

What is it dad?! Tell us

Come on... Tell us

What do you think about joining one of the workshops and summer events like last year, remember!

You Said it Dad... Last year was different than that year

But what about physical distance?

I do not mean exactly the same like last year, because participating in these distinguished summer activities will be remotely, just like distance learning

Ahaaa .. You mean through new software and applications such as Zoom, MS Teams and Instagram?

Do you remember the scout you participated in last summer ... They are doing the same thing, but remotely, in addition to fun training courses held by scientific and cultural clubs

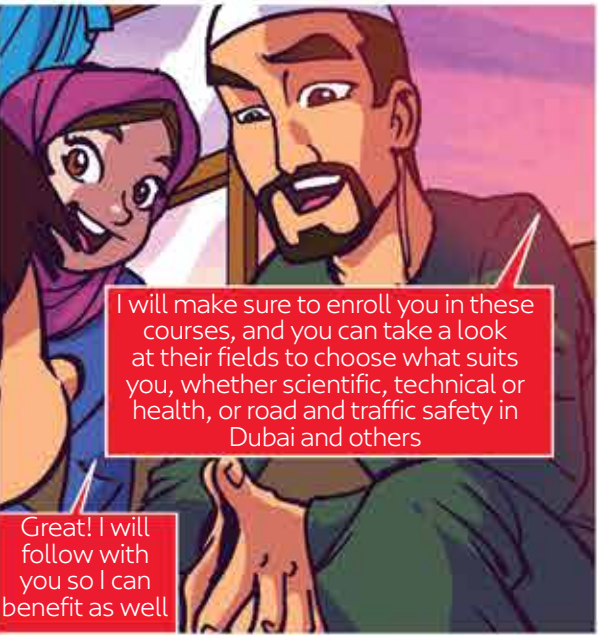

Exactly ... I have a friend who is involved in organizing these activities and encouraged me to invite you to enroll

But what are these activities and events?

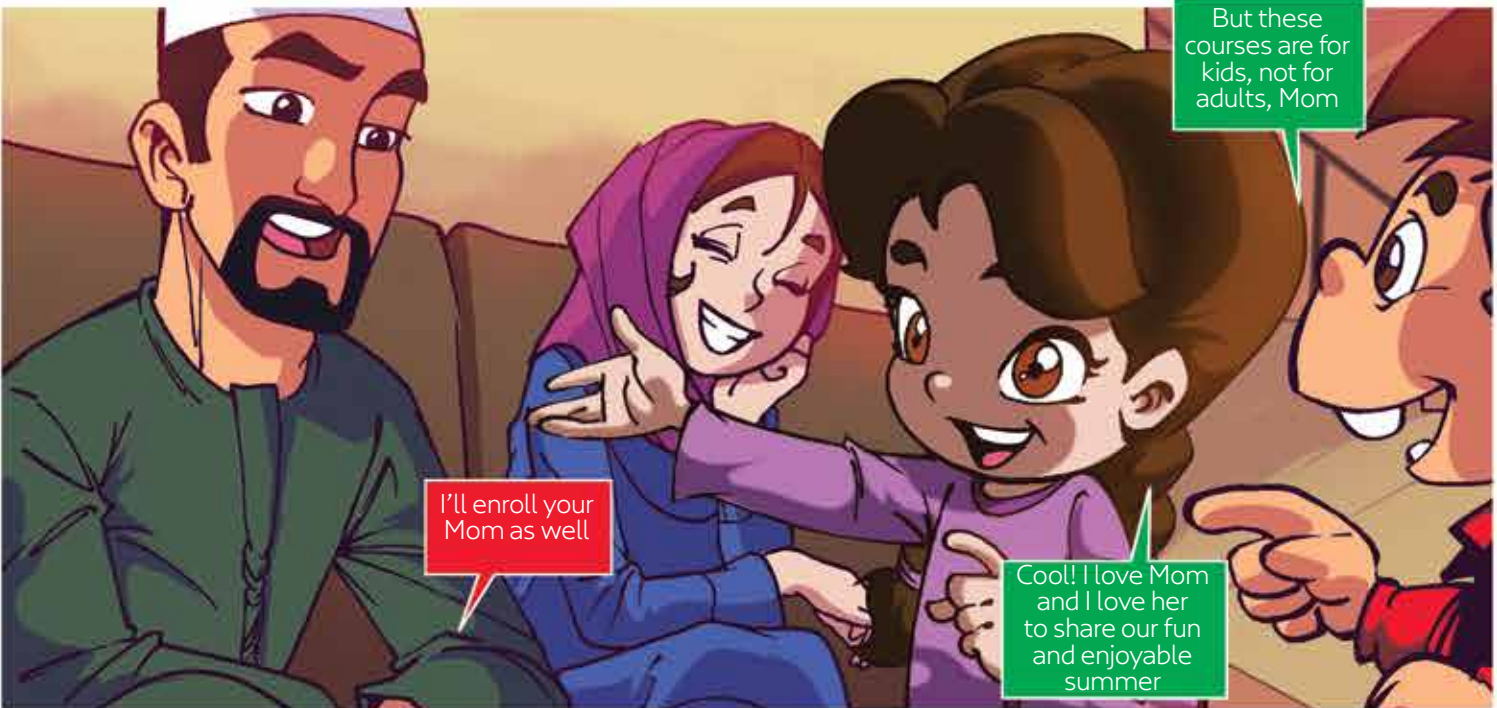

How cool! We can stay safe and healthy but learn new things at the same time

I will make sure to enroll you in these courses, and you can take a look at their fields to choose what suits you, whether scientific, technical or health, or road and traffic safety in Dubai and others

Great! I will follow with you so I can benefit as well

I'll enroll your Mom as well

But these courses are for kids, not for adults, Mom

Cool! I love Mom and I love her to share our fun and enjoyable summer

Engineer Salem

Safe Shopping

Isn't it easier for you to send me a message via phone or "WhatsApp"?

Better nowadays not to use the mobile phone when you are out, especially when shopping

Yes, I heard that in the virus protection instructions

Well, son, let's go out so we won't be late

Do not forget to adhere to shopping prevention precautions, the most important of which is never to touch your face

Okay, Dad

Both Salem and his Son arrived at a shopping mall and before entering, they underwent a body temperature test.

Then they sterilized their hands, and before receiving the shopping cart, a worker sterilized it, especially the handles.

We must maintain a physical distance of not less than 2m between us and others

Sorry dad, I forgot

One of the most prominent problems that most people fall under is forgetting and not dealing with caution and seriousness

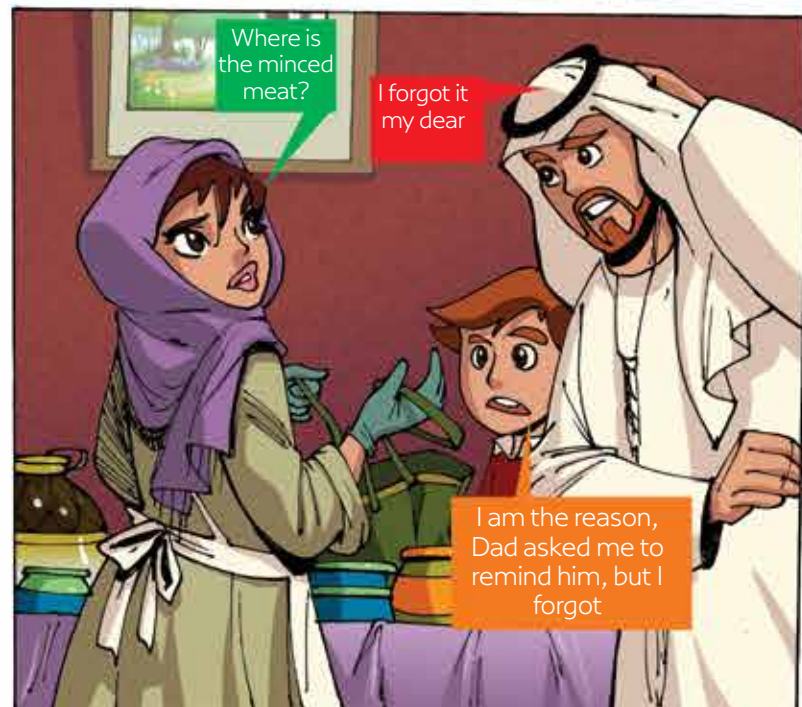

These things increase the chances of the virus spreading

As I advised you son ... You should get rid of the gloves and the masks in a correct way

I will sterilize, clean, and arrange purchases

Sure Dad... I will not forget washing my hands well with soap and water

Where is the minced meat?

I forgot it my dear

I am the reason, Dad asked me to remind him, but I forgot

I knew you would forget some purchases ... Next time I will go shopping

Sound good to me

Super Nader

Fire Ant

Senario: Eman Hosny
Illustrations by: Shaimaa Ibrahim Gamil

In the previous Issue ...

Nader with the boys of the camp started preparing for a campfire party, but because of Hammoud and Aboud who were in a hurry, a major fire would have occurred in the camp had it not been for Super Nader who saved the situation. What happened this time?!

Oh, I love the morning in the camp when we wake up for exercise

Boys, be sure to do exercises daily, even after going home. It helps keep you active all day

OUCH! My legs

ouch!

OMG, OUCH!
Fire ... fire in my legs

What's wrong with you boys...
What is going on?

Seems they couldn't bear exercising ...
hahahahahaha

OMG! I feel that my entire body is on fire

I'm going to bring the first aid kit

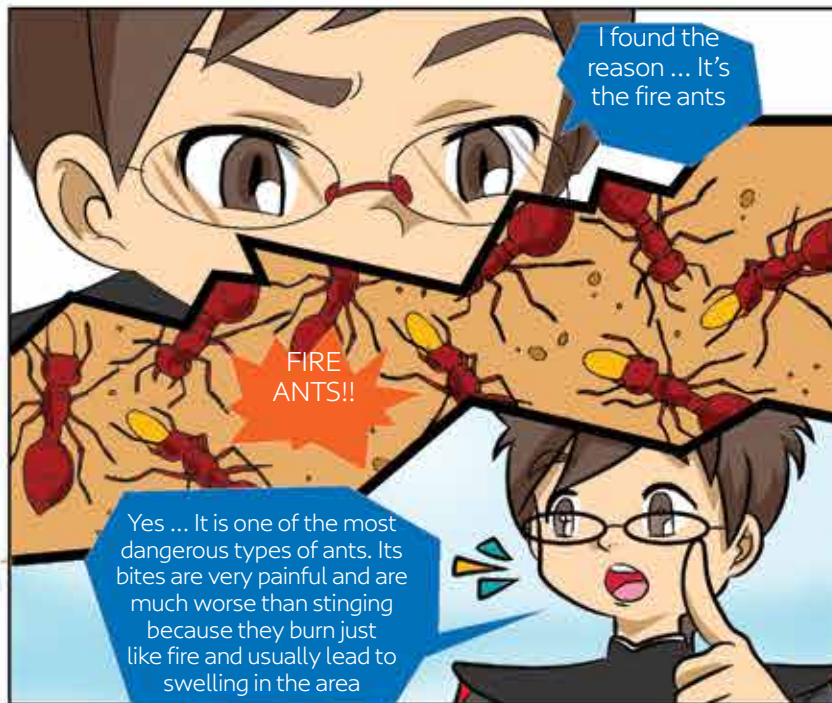

I think this is an insect bite

You silly, I feel stinging and swelling in my feet

It seems that you have forgotten to put the insect bite ointment on your body as I asked you to

I notified you earlier, insects are usually active during the evening until dawn, so this is the time most needed to protect yourself against different types of insects

I found the reason ... It's the fire ants

FIRE ANTS!!

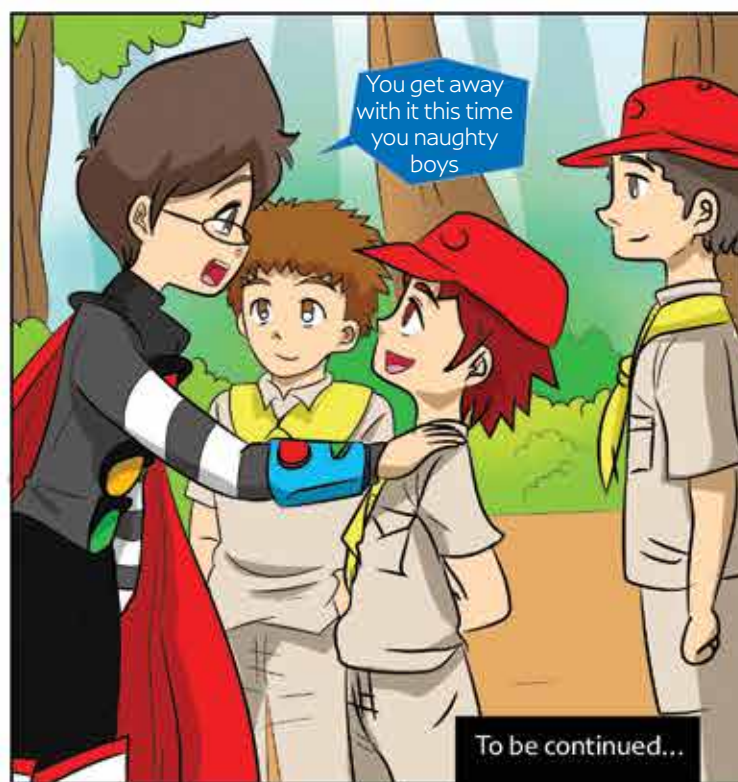

Yes ... It is one of the most dangerous types of ants. Its bites are very painful and are much worse than stinging because they burn just like fire and usually lead to swelling in the area

Don't worry, the best remedy for pain is ice, but it should be wrapped with a soft cloth, and not applied directly to the skin

What are we going to do now?

After that I'll take them to the camp doctor

You get away with it this time you naughty boys

To be continued...

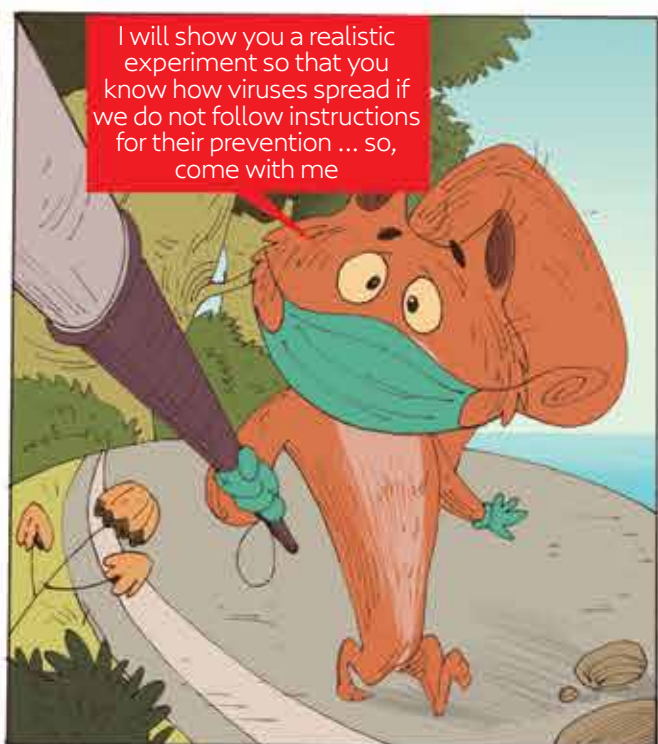

Traffic Jungle

How do Viruses Spread?

Let me introduce myself dear friends: I am the wise Squirrel ... As we live in an unusual circumstance with the presence of Covid-19, I must show you in this video how it spreads?

Look ... Suppose this yellow liquid is the virus and I have put it on the gloves I wear and we will see how it can be transmitted through the transmission of the yellow color to the surfaces that we touch

I will show you a realistic experiment so that you know how viruses spread if we do not follow instructions for their prevention ... so, come with me

There is a high risk of transmitting the virus very quickly while shaking hands

Look... Unconsciously, he tried to adjust his mask and the color moved to it, and the virus became close to the nose, mouth, and eyes

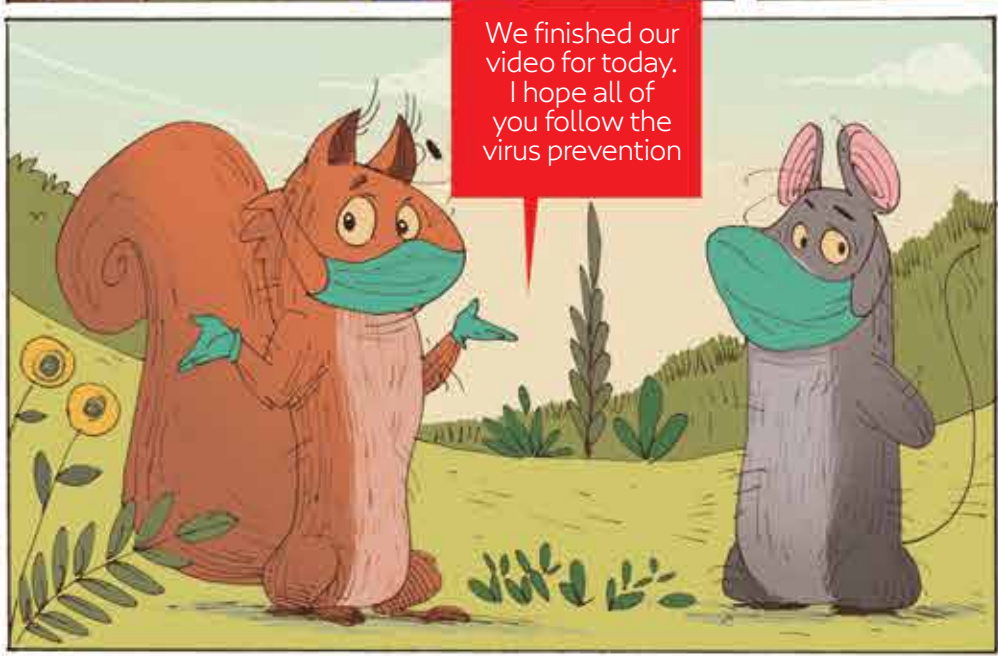

AS you can see, they transmit the virus to anything they touch

Therefore, whoever touches the surfaces contaminated with the virus, it transmits to them while they pass it on to others ... and so on

That's why we need to wash and sanitize our hands constantly

We finished our video for today. I hope all of you follow the virus prevention

instructions so that we can get rid of it completely Inshallah

Paper Recycling

Senario : Eman Hosny
Illustrations : Shaimaa Ibrahim Gamil

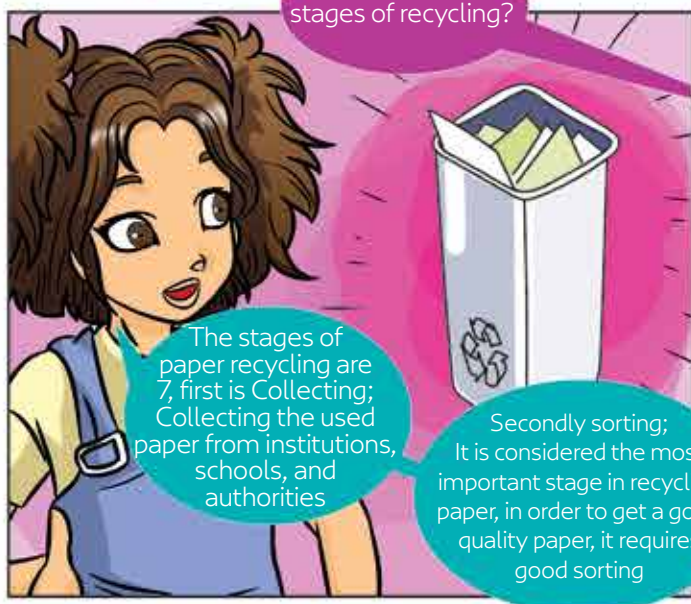

There are acceptable types such as newspapers, magazines, brochures, white paper, wallpaper and decoration and all similar things

Are all types of paper recyclable?

What about unacceptable types?

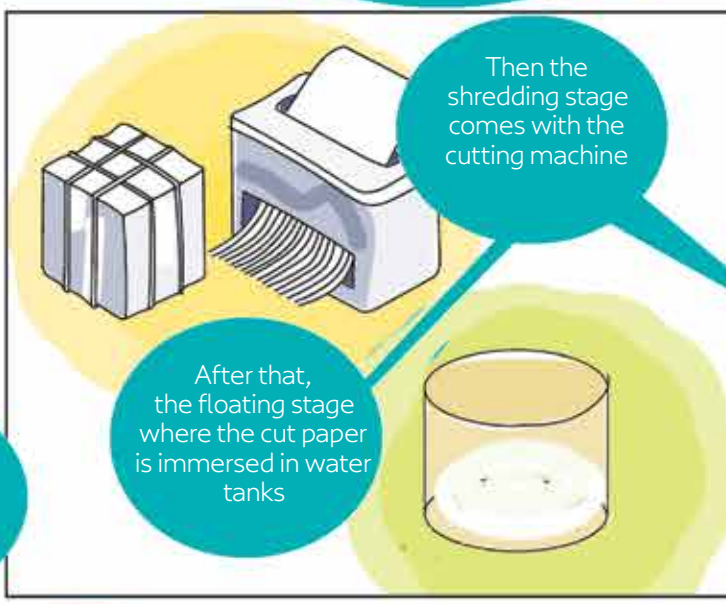

Unacceptable types include paper stained with food, paint, or dirt in general and hygiene products such as napkins and nappies, sticky paper or duct tape, gift wrappers and candy wrappers

What are the stages of recycling?

The stages of paper recycling are 7, first is Collecting; Collecting the used paper from institutions, schools, and authorities

Secondly sorting; It is considered the most important stage in recycling paper, in order to get a good quality paper, it requires good sorting

Then the shredding stage comes with the cutting machine

After that, the floating stage where the cut paper is immersed in water tanks

After that, the paper-cut mixing stage is used by a mixing device to get the dough

Then the formation stage in which the paper is formed in different ways, according

to the required product... The last stage is drying the formed paper

Gosh! All these steps?

Don't worry, this is done in a special factory

I have an idea to reuse paper

What is it?

I will make some artwork out of old paper to decorate my room with

Wonderful dear ... I will help you implement the idea

Sahih, The Roads Friend

Roads and Transport Authority Services (Dubai Drive Application)

Hello my dear friends ...
"Dubai Drive" application
is the perfect road
companion that provides us
with advanced services ...
Let's know more about it

The services of this application
include searching for available
parking lots, paying parking fees,
reviewing the record of payments
and violations, and direct chatting
at any time with a customer
service center employee

It also includes obtaining green points
with every electronic transaction and
Dubai service for plate number and
driver's license replacement in case
of lost or damaged. It also enables us
to view the official documents of our
traffic file easily

In addition to safe payment
for all services such as
Salik fee payment, we can
also give notes and report
technical problems in the
application

Enjoy the best applications
from the Roads and Transport
Authority in Dubai and stay
tuned for the next episode,
God willing

Inspector Hamad

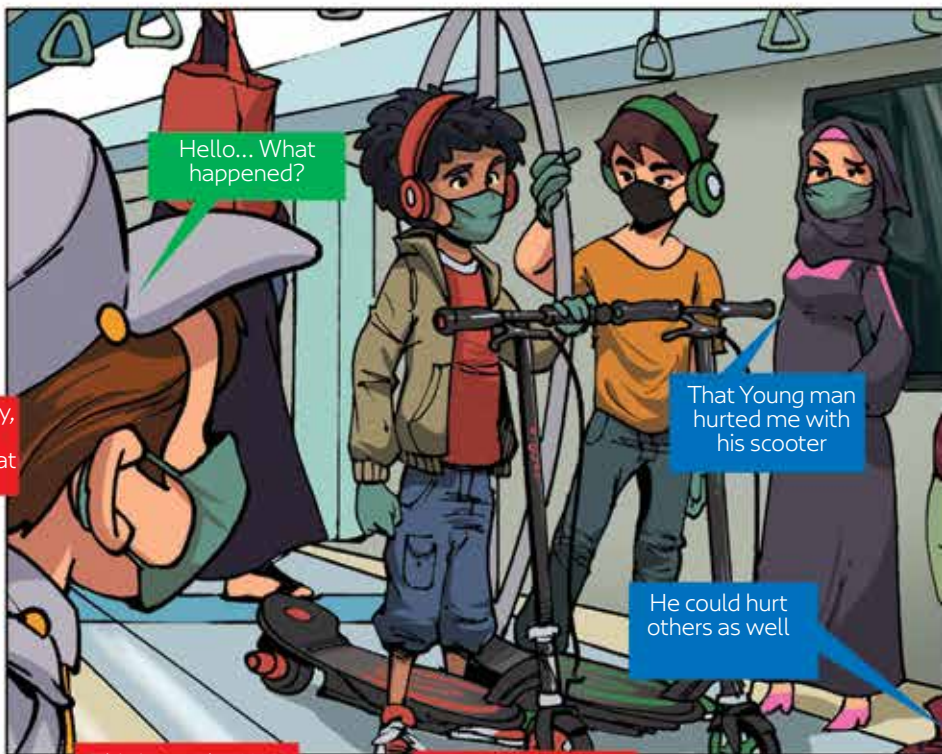

Scooter in Dubai Metro and Buses

Scenario: Loulwa Thani

Ouch! You hurt me

I am sorry, I didn't mean that

Hello... What happened?

That Young man hurt me with his scooter

He could hurt others as well

Listen to me sir ... this was an accident and I'm sorry

I believe you ... Therefore, it is preferable to carry the scooter after folding it and then place it in the place designated for that, whether inside the metro or the bus

This is good ... We did not know that before

RTA is keen to delight customers and meet their needs, and the bike or scooter can be folded out of peak times and placed in places designated for luggage

Excellent ... scooter and bike too!

Certainly, just be careful while walking so as not to hurt someone again

Thank you, Inspector ... We will abide by the laws and at the same time benefit from our advanced equipment that makes our transportation much easier than before

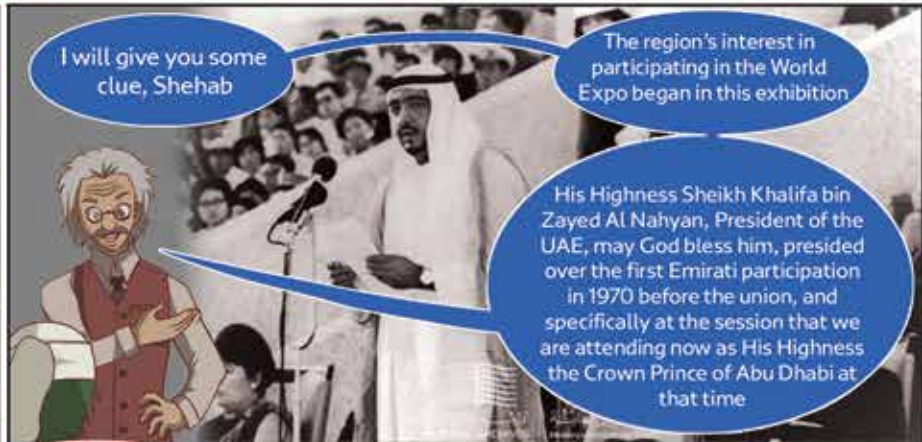

Stay Safe
