The Blindfold

Sweet Words

Our Guidance is Born

Hello,

The universe shone brightly in celebration of the Prophet's Birthday.

This great moment was captured in the words of the Ahmed Shawqi the famous arab poet:

"When the Prophet was born, the creatures turned into light. It was praised and smiled upon by the world."

The Noble Prophet and the Greatest Messenger Mohammad, peace be upon him, was born in the Year of the Elephant in Rabi' al-Awwal. It's as if a date had been assigned to mankind to impart good qualities and guide them along Allah's path. We are blessed with the gift of Allah's Messenger, whose mission was to erase darkness from the world and spread light to all. Previously, people worshipped idols, so he guided them to worship Allah, the One God.

As one of Allah's names is The Source of Peace, he asked to spread peace among people.

He encouraged them to renounce hatred and become tolerant and urged the rich to look out for the poor.

It was the Messenger's teaching that the elder should sympathize with the younger and the younger should respect the elder. It was he who taught us compassion, mercy, and love. Thus, he deserved Allah's praise in the Noble Qur'an: {And indeed, you are of a great moral character}. Surah Al-Qalam Verse: 4.

Salama

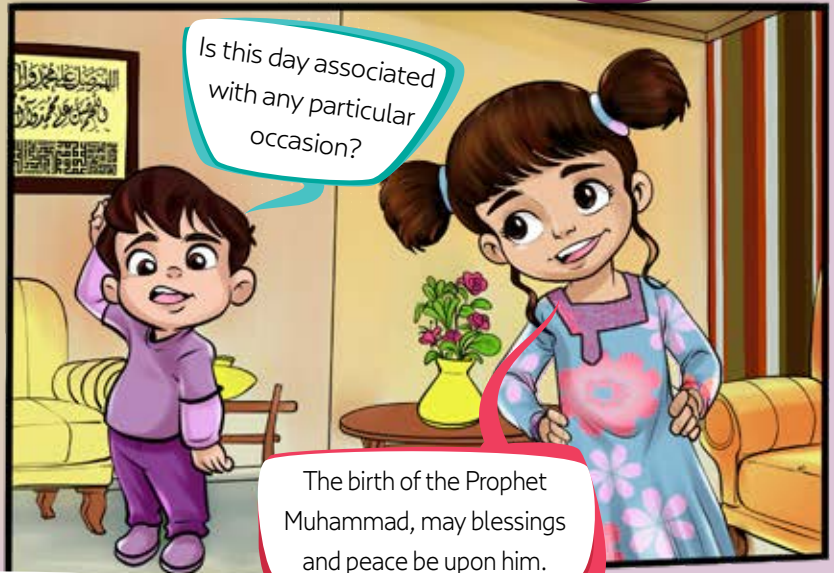

Prophet's Birthday

Illustrated by: Omar Sharif

I'm Salama

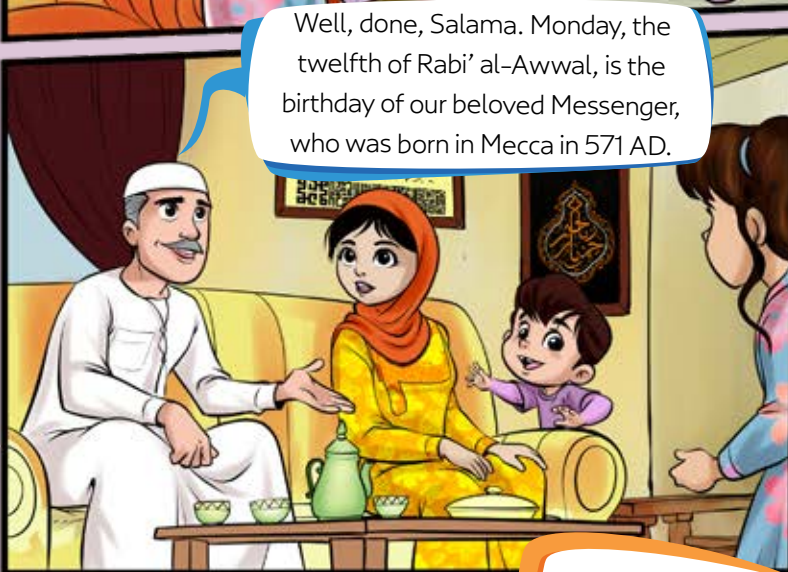

12th Rabi' al-Awwal is a memorable occasion and a precious memory.

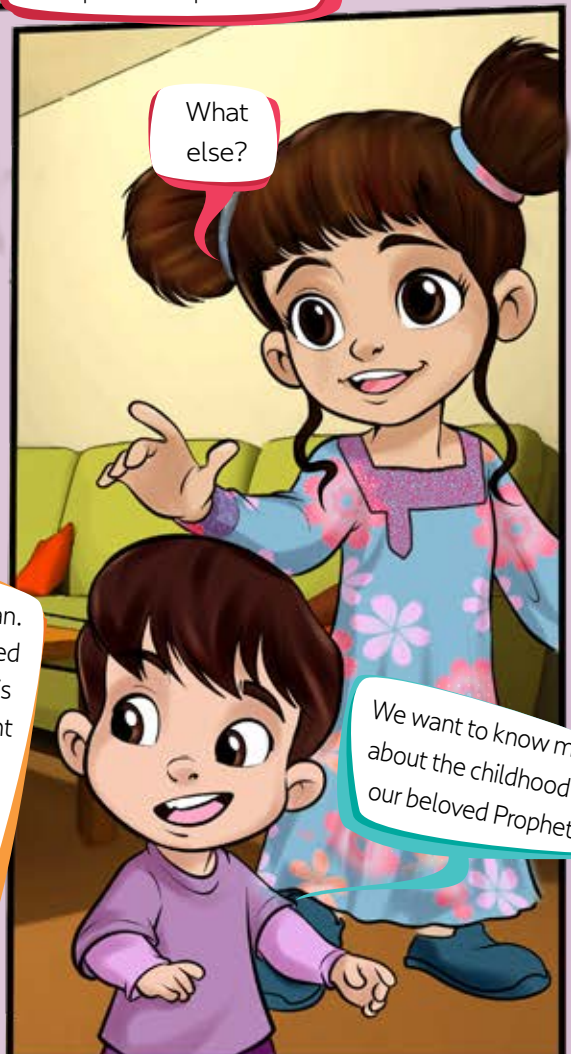

Is this day associated with any particular occasion?

The birth of the Prophet Muhammad, may blessings and peace be upon him.

Well, done, Salama. Monday, the twelfth of Rabi' al-Awwal, is the birthday of our beloved Messenger, who was born in Mecca in 571 AD.

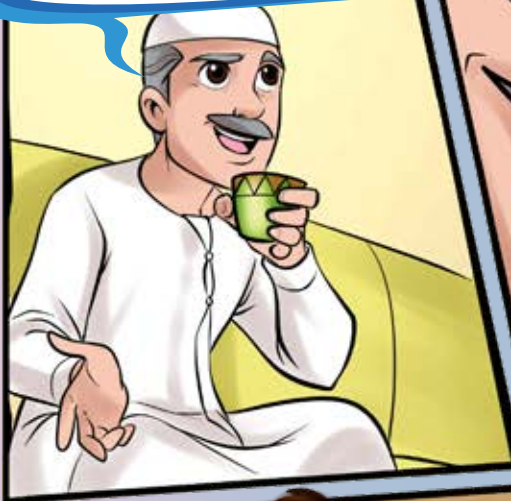

What else?

We want to know more about the childhood of our beloved Prophet.

He was born an orphan. His father Abdullah died before he was born. His mother was Aminah bint Wahb. His grandfather Abdul Muttalib took care of him, and he was breastfed by his Halima Al Saadia.

He was a wonderful child, loved by everyone who saw him. His uncle Abu Talib took care of him after the death of his mother and grandfather when he was young.

As a boy, the Prophet herded sheep until he grew up and became an honest and trustworthy trader in Mecca.

How do we celebrate the birth of the Prophet, Dad?

Follow me to the library.

By reading his fragrant biography, observing his great stances, and imitating his example.

We'll read the book together tonight.

In its lines, we highlight the greatest attitudes and lessons of a noble Messenger whom God sent as a mercy for all creation.

E-scooter Part 3

Engineer **Salem**

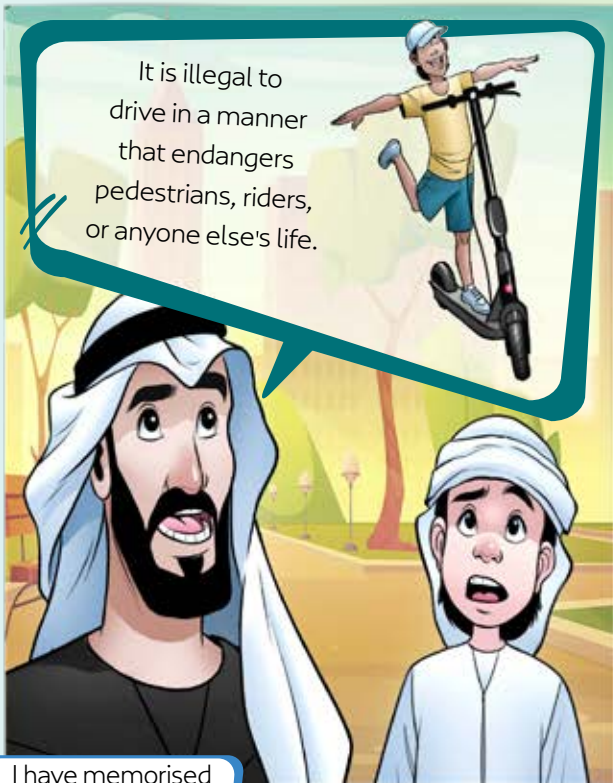

The relevant entities must also be informed when any accident occurs, whether the accident caused harm to others or not.

This girl adheres to the public safety requirements while driving.

Indeed, she is driving on the lane of the electric scooter. It is forbidden to drive elsewhere.

It is illegal to drive in a manner that endangers pedestrians, riders, or anyone else's life.

Wearing the right clothing and footwear while crossing pedestrian crossings is mandatory, as is following traffic laws.

I have memorised and understood the safety conditions well. Will you then allow me to drive the new electric scooter?

Of course.

Take care, son.

Champion **Nader**

What's this?
A virtual friend is
bullying me.

How did she
do that?

After posting my picture, her messages
came pouring down, taunting my hair and
claiming that I had a big nose.

I can't stand
cyberbullying...
I can't stand it.

We must stop
cyberbullying, it's
unethical.

A girl is cyberbullied? Is this
possible? I must intervene at once.

Never be sad.
You won't
be harassed
or bullied
anymore. I have
a solution.

What's it?

GoBubble is a social
networking platform
that allows students
to communicate
through a safe virtual
environment.

For your sake, the Dubai Future Foundation paved the way for this startup to enter the UAE by facilitating cooperation with the Knowledge and Human Development Authority in Dubai.

This is to prevent cyberbullying and provide online protection for students in Dubai schools.

Great idea, especially since some kids spend hours surfing the internet and we cannot be sure that what they are watching is safe and harmless.

You're right. This platform is designed for school children and allows them to communicate inside and outside the school in a safe virtual environment.

By carefully examining the sent content before releasing it online. Another benefit is that GoBubble covers 130 schools in Dubai.

How does the platform provide a safe environment?

From now on I will make sure that I use the GoBubble platform, as it protects me from cyberbullying.

With it, you'll be safe and secure.

My School ...

How lovely to see you again Back to school after the Covid pandemic

Prepared by: Shareef Abu taha

What do you feel like after going through the online learning experience during the pandemic and returning to a classroom? And what brilliant thoughts did you have while participating in remote learning without your classmates?

The Salama Magazine editorial team held a Salama assembly with students from the International School of Choueifat and came up with the following conclusions:

Joyous Experience

Rawan Sultan said: I was glad to return to school after spending so much time at home. Nevertheless, staying at home made us feel comfortable within our own family and environment. It also exposed our laziness, but nothing can compare to having friends and teachers around to assist us with academic challenges.

Seeing my friends and colleagues whom I did not know in one place was a very joyous experience for me. School cannot be replaced by any other place.

Human Contact

Yousef El Zayat said:

At first, the two-week vacation seemed like a dream. However, after two years, I can say this with confidence: the screen can never replace the face. Although I may be more relaxed at home, human contact and increased focus on in-school learning are unparalleled.

Online Communication

Alicia Franklin said:

We were all thrilled when we first heard about the two-week delay, but once it became a month and then three months, this joy soon turned to boredom. While online learning and communication proved a positive experience for some of us, the lack of in-person teachers caused us to lose focus and ignore homework assignments.

After more than a year of online learning and switching to the hybrid system, we finally went back to school after getting used to the silence and quiet of our rooms. Returning to school despite the precautions was fun.

Quarantine-free

Tulin El Shawa said:

As I was trapped in the quarantine, isolated and frustrated, my return to school was a relief for me, but it made me realize how important school is and how social interaction is. I feel refreshed, rejuvenated and happy to be able to go to school again. I cannot wait to have a wonderful year with all my friends and teaching staff.

Happiness

Shahd Al Shamsi said:

We felt trapped in our homes when the pandemic first started. Academically the students were not doing well, and the teachers were not able to get their attention. Over time, many people accepted their new routine even though everything was difficult for them. The students were thrilled when they returned to school.

Exchanging a smile

Maya Ezzeldine said:

It was exciting to go back to school after spending so much time at home. We were confused and unaccustomed to meeting each other after we had been in quarantine for a while. There may be distractions in e-learning that led to a loss of focus and lower academic performance. However, returning to the school campus reminded us of the importance of attendance and focus. Being able to greet each other every morning or exchange a smile when we met for the first time after the quarantine period was a wonderful feeling.

Mohammed bin Rashid Library

Scenario: Hamdi Hashem Hassanein

Faris and

Shaheen

Wow! What's this masterpiece?

Mohammed bin Rashid Library. It's designed in the shape of an open book.

Atop Dubai Creek stands the library building, proclaiming that this waterway's purpose is not only to move ships, but also to foster culture, science, and civilisation.

The Mohammed bin Rashid Library was opened as a culmination of His Highness' initiatives, affirming that ideas and bright minds are what make the future.

It serves both young and old readers, researchers and enthusiasts, making it a beacon of knowledge for the whole world.

Tell me more about the library's contents.

Over 1.1 million books, both paper and digital, in both Arabic and English, make up the library's scientific and literary collections.

The Library includes 6 million dissertations, 63,000 music scores, 7,000 rare videos, 13,000 articles and 5,000 historical print and digital journals.

There is a robot that helps children as well.

Indeed. There are more than 25,000 titles in the Children's Library, and robots are available to assist Children of Determination.

Also available at the library are illustrated stories and 3D books for children, as well as 1,000 Braille books for the visually impaired.

You encourage me to visit the library and to immerse myself in culture and knowledge.

Zarqaa Al Yamama

Illustrated by: Omar Sharif

Foreseeing
the future

I liked the Museum of the Future.
It takes me through the eras of
history to see and hear everything
that happened in the past.

As we
journey through
time, I'll introduce
you to Zarqaa Al
Yamama.

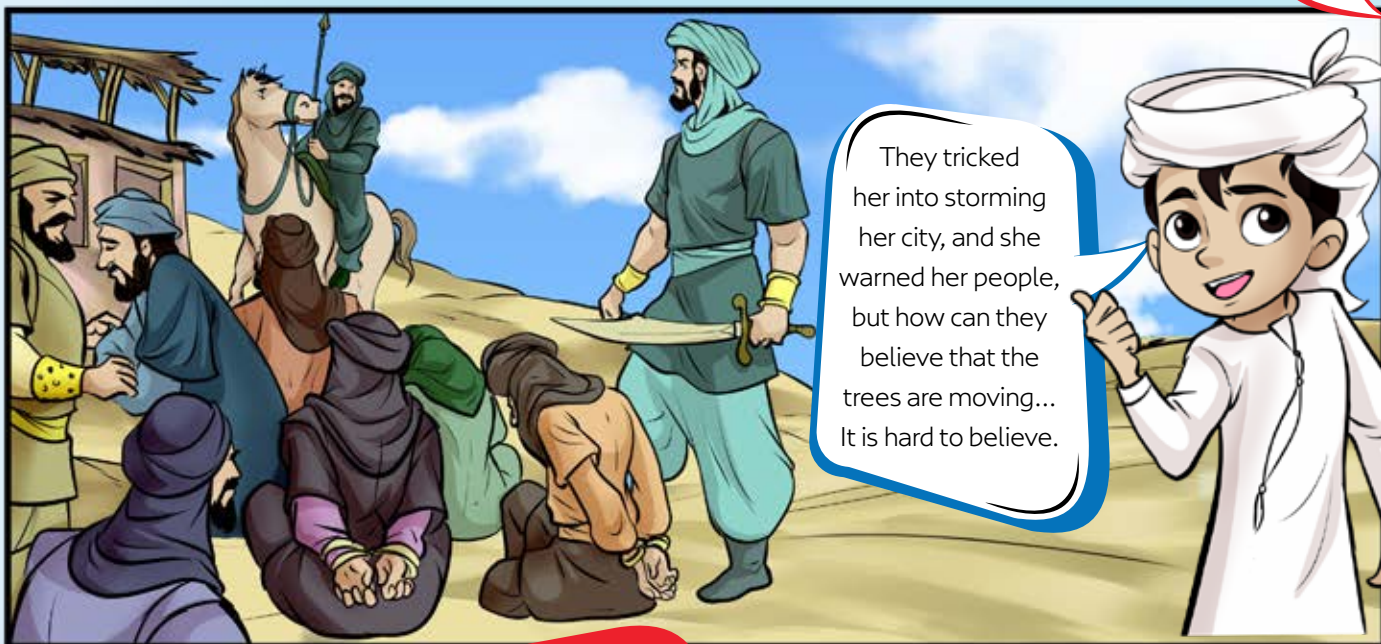

Her name is Anz, and she is from
the Jadis tribe. She lived in Al
Yamamah and was famous for
her sharp eyesight and her
ability to see things from
long distances.

She was always
the key to victory for
her tribe. She watched
the movements of the
enemy army and relayed
them to her tribe as they
approached.

Immediately, the army of her
tribe is ready to defend their city.
Zarqaa Al Yamamah has done
them a great service with
her piercing eyes, which
made them ready.

It is a trick
that the enemy army
made after they were
unable to storm the city
of Zarqaa Al Yamamah.
They resorted to the trick
afterwards.

What's the secret of
those moving trees?

Safety Road

There are surveillance cameras and sensors that ensure the bus is free of students at the end of the trip. There is also an emergency notification feature to communicate with the control centre.

Students are identified using radio waves when they enter the bus and GPS tracking systems are installed to locate board-and-get-off locations.

They are also fitted with self-extinguishing systems compatible with the highest local and international standards of quality and safety.

All bus attendants are trained on how to cope with emergency conditions, deliver First Aid and other aspects.

They are also subjected to intensive training programmes by specialist instructors to train them on safe and responsible driving practices in line with RTA's regulations that prioritise the safety of students.

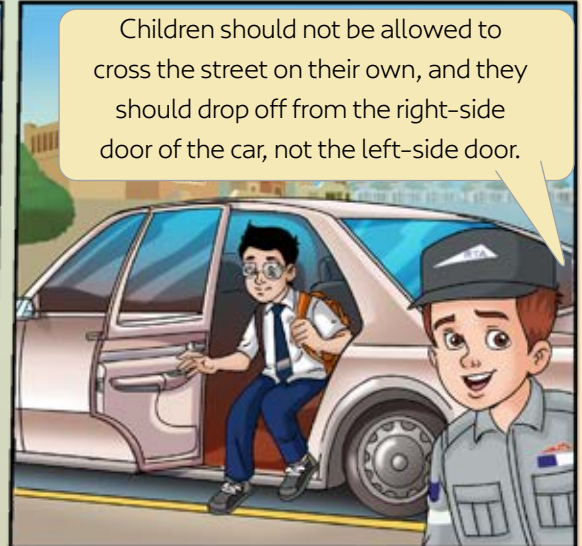

School Safety

Illustrated by: Hossam Abdel Ghani

Inspector **Hamad**

I wanted to share some advice with parents when dropping their children off or picking them up at school.

Children should not be allowed to cross the street on their own, and they should drop off from the right-side door of the car, not the left-side door.

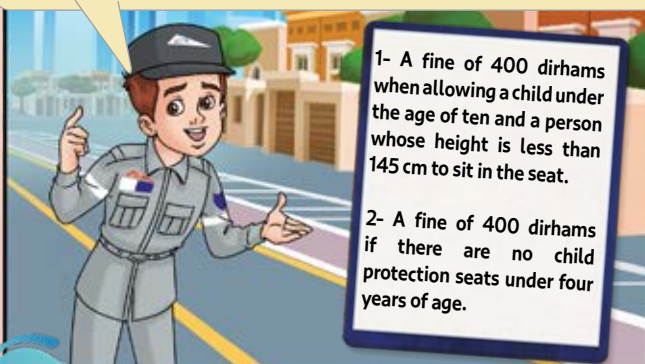

Please don't park in places that aren't designated for parking, and don't drop off students in the middle of the street.

Before taking off, make sure there are no children near the vehicle, as many children's run-over accidents occur due to inattention.

When approaching the school, the student must be prepared so that parents do not obstruct traffic by stopping for a long time. I remind you of some traffic violations.

- 1- A fine of 400 dirhams when allowing a child under the age of ten and a person whose height is less than 145 cm to sit in the seat.
- 2- A fine of 400 dirhams if there are no child protection seats under four years of age.

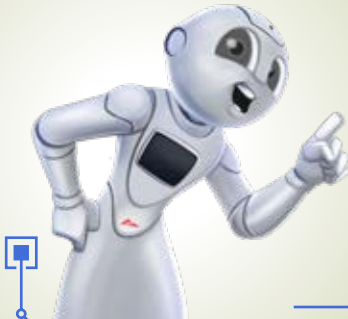

Parents should follow traffic precautions to keep their children safe in the car until they arrive safely and securely at school and home.

S'hail...

The smartest way to navigate Dubai

Mahboub

Hello friends.

In this issue, I will talk about the features of the S'hail app- the smartest way to navigate Dubai

Make sure to log in or sign up to take advantage of all the benefits.

Now you can see all the public transportation options near you, as well as their departure times.

Scan the QR code at the station or take a look to see all bus routes in the area and departure times.

If you want to plan your trip, set an alert for your upcoming trip. You can search for areas that interest you and are close to you.

Check your nol Card balance and charge it before you start your journey. All of that is in 9 different languages.

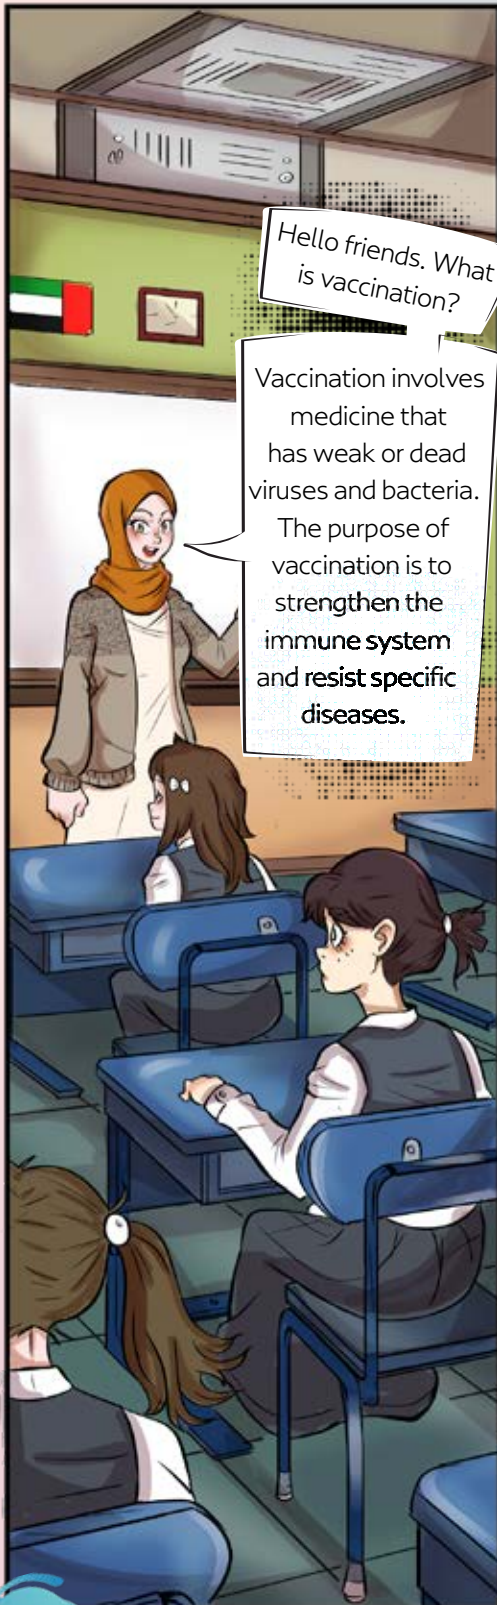

Vaccination is Protection

Illustrated by: Abdel Fattah Helmy

Prepared by: Sherina Lootah
Dubai Health Authority

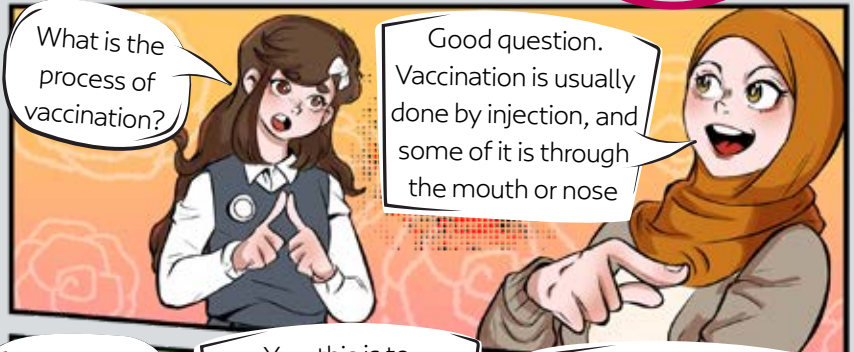

Miss

Weqaya

Hello friends. What is vaccination?

Vaccination involves medicine that has weak or dead viruses and bacteria. The purpose of vaccination is to strengthen the immune system and resist specific diseases.

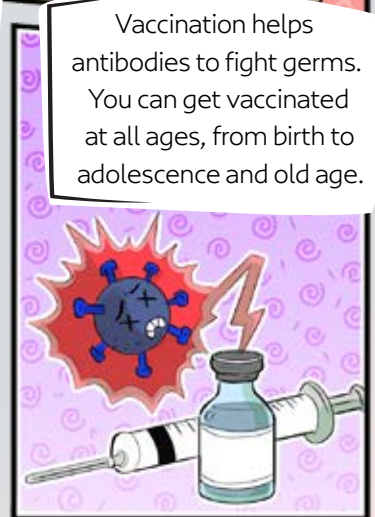

What is the process of vaccination?

Good question. Vaccination is usually done by injection, and some of it is through the mouth or nose

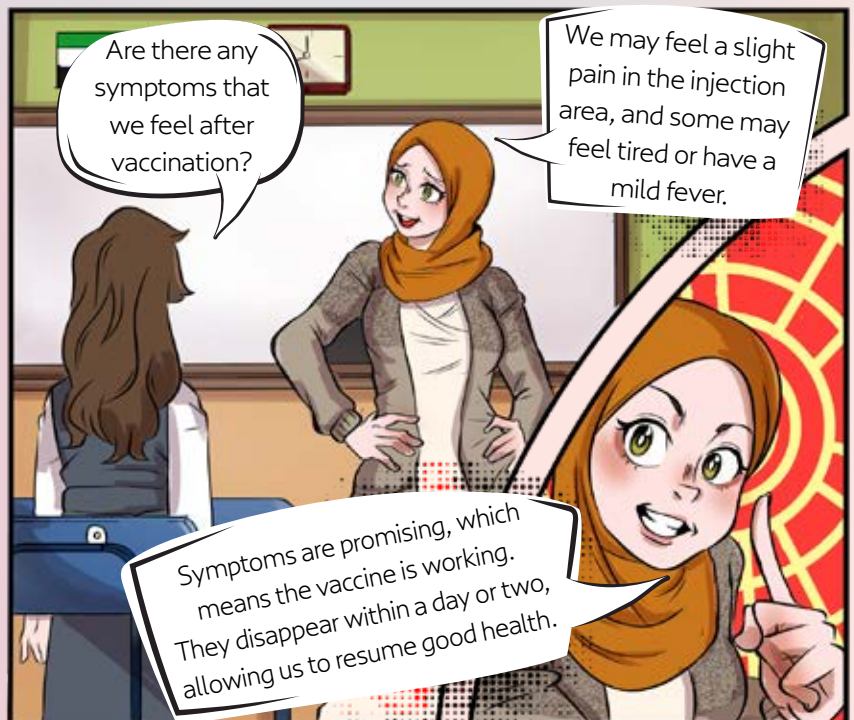

Is it necessary to get vaccinated?

Yes, this is to prevent diseases like measles, pneumonia, and polio.

Vaccination helps antibodies to fight germs. You can get vaccinated at all ages, from birth to adolescence and old age.

Are there any symptoms that we feel after vaccination?

We may feel a slight pain in the injection area, and some may feel tired or have a mild fever.

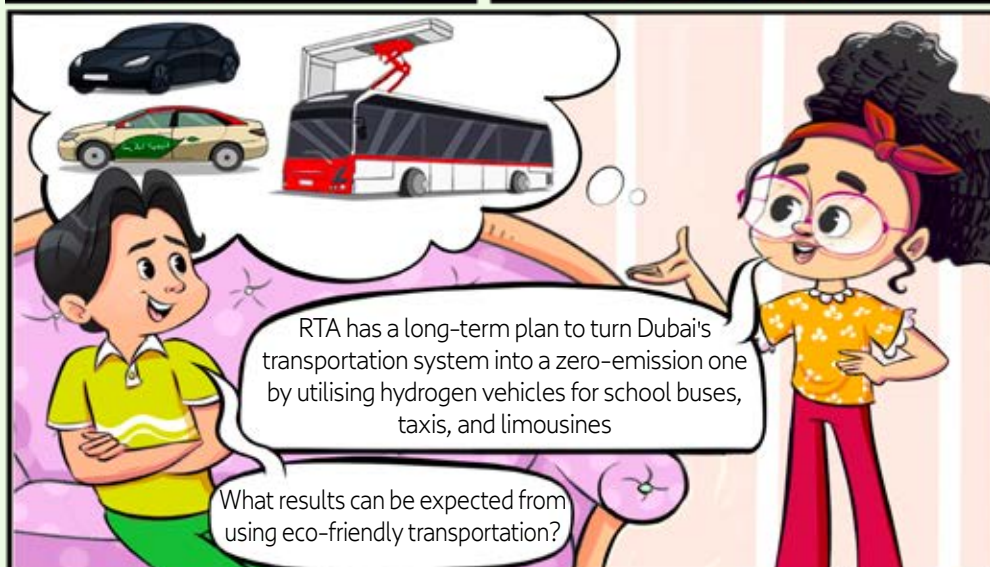

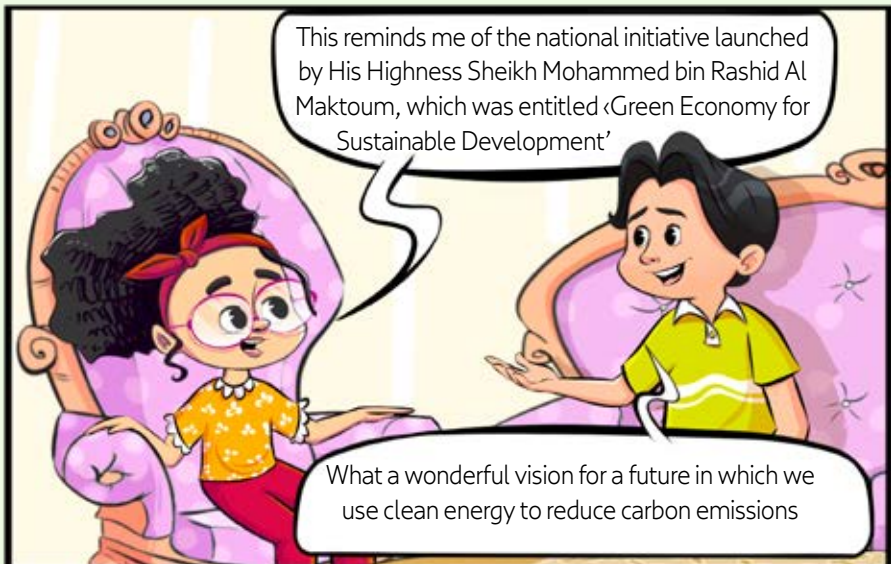

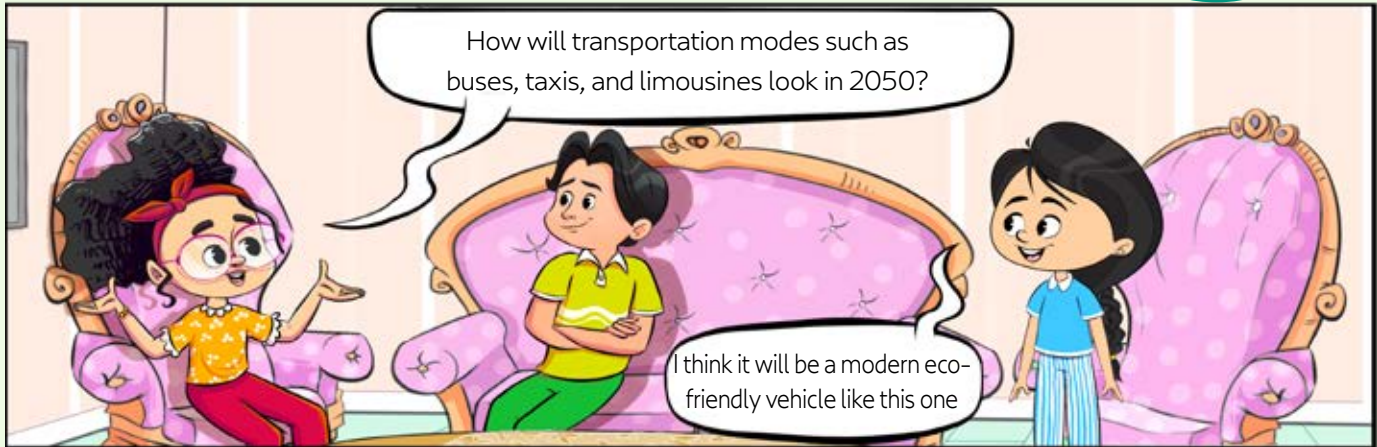

Symptoms are promising, which means the vaccine is working. They disappear within a day or two, allowing us to resume good health.

We want to learn a new game

From one of our family heritage games that we are proud of.

Today's game is hide-and-seek.

Children gather from neighbours, relatives, or friends to play this game.

The game is played by blindfolding one of the players with a strip of cloth.

The child, blindfolded, tries to catch one of the players, who make noises that confuse the blindfold's movement.

When he succeeds in catching one of the players, he replaces him in the search process.

Define and classify disabilities
