

# Your gateway to smart bus waits

Through the Build-Operate-Transfer (BOT) Model, in partnership with the private sector, 1500+ smart bus shelters will be designed and implemented across Dubai.

Benefits of Smart Bus Shelters:

**Air-conditioned**

**Fitted with Real Time Passenger Information system (RTPI) screens that show detailed information about the bus schedule**

**Calculates the number of users in the bus shelters, and notifies the control centre in case the bus shelter is overcrowded**

**Determines the number plates of vehicles that are not licensed to use bus parking**

**Identifies negative practices such as sleeping in the shelter, smoking, and leaving behind of belongings and rubbish**

**Determines the status of the bus shelter in terms of cleaning and maintenance operations**

**Encourages the use of public transportation (buses)**

**Works at raising the satisfaction rate of bus users**
